Contents

Preface ix
Editor xi
Contributors xiii

Chapter 1 Mechanics of Elastic Waves and Ultrasonic Nondestructive Evaluation 1
Tribikram Kundu

Chapter 2 Modeling of Ultrasonic Fields by Distributed Point Source Method 109
Tribikram Kundu, Dominique Placko, Samik Das, Thierry Bore, and Ehsan Kabiri Rahani

Chapter 3 Electromagnetic Nondestructive Evaluation 169
Peter B. Nagy

Chapter 4 Distributed Point Source Method for Modeling and Imaging in Electrostatic and Electromagnetic Problems 249
Dominique Placko, Thierry Bore, and Tribikram Kundu

Chapter 5 Guided Waves for Plate and Pipe Inspection 295
Tribikram Kundu

Chapter 6 Fundamentals and Applications of Nonlinear Ultrasonic Nondestructive Evaluation 395
John H. Cantrell

Chapter 7 Theory and Applications of Laser Ultrasonic Techniques 457
Sridhar Krishnaswamy and Feifei Zhang

Chapter 8 Material Characterization by Nonlinear Ultrasonic Technique 493
Jin-Yeon Kim, Laurence J. Jacobs, and Jianmin Qu

Chapter 9 Toward Structural Health Monitoring Solutions for Bolted Joints 515
Alexi Rakow and Fu-Kuo Chang

Chapter 10 Measurement of the Elastic Properties of Solids by Brillouin Spectroscopy 539
Marco G. Beghi, Arthur G. Every, Vitali B. Prakapenka, and Pavel V. Zinin

Chapter 11 Theory and Applications of Scanning Acoustic Microscopy and Scanning Near-Field Acoustic Imaging 611
Pavel V. Zinin, Walter Arnold, Wieland Weise, and Sofia Berezina

Chapter 12 Ultrasonic Characterization of Biological Cells 689
Christopher Blase and Jürgen Bereiter-Hahn

Chapter 13 Ultrasonic Characterization of Hard Tissues 723
Kay Raum

Chapter 14 Clinical Applications of Ultrasonic Nondestructive Evaluation 745
Yoshifumi Saijo

Chapter 15 Terahertz Radiation for Nondestructive Evaluation 771
Ehsan Kabiri Rahani and Tribikram Kundu

Chapter 16 Fiber-Optic Sensors for Structural Health Monitoring 815
Nobuo Takeda, Yoji Okabe, and Shu Minakuchi

Index 861
