

## CONTENTS

|  |           |
|--|-----------|
| <b>Preface</b>   | <b>v</b>  |
| <b>Introduction</b>  | <b>1</b>  |
| <b>Chapter 0. Preliminaries and notations</b>  | <b>9</b>  |
| 0.1 Linear operators   | 9         |
| 0.2 Interpolation spaces   | 13        |
| 0.3 Fractional powers and interpolation  | 17        |
| <b>Chapter I. Multivalued linear operators</b>                                       | <b>21</b> |
| 1.1 Definitions  | 21        |
| 1.2 Sum and product of multivalued linear operators                                  | 22        |
| 1.3 Resolvents of multivalued linear operators                                       | 23        |
| 1.4 Fractional powers and interpolation spaces                                       | 25        |
| 1.5 Dual operators   | 27        |
| 1.6 Modified resolvents  | 27        |
| <b>Chapter II. Degenerate equations of hyperbolic type</b>                           | <b>29</b> |
| 2.1 Generation of semigroup  | 29        |
| 2.2 Multivalued equations $\frac{du}{dt} \in Au + f(t)$                              | 33        |
| 2.3 Dissipative multivalued linear operators   | 35        |
| 2.4 Degenerate evolution equations   | 37        |
| 2.5 Examples   | 40        |
| <b>Chapter III. Degenerate equations of parabolic type, I: The autonomous case</b>   | <b>47</b> |
| 3.1 Generation of infinitely differentiable semigroups                               | 47        |
| 3.2 Multivalued linear equations $\frac{du}{dt} \in Au + f(t)$ in the parabolic case | 53        |
| 3.3 Degenerate evolution problems of parabolic type                                  | 55        |
| 3.4 Maximal regularity of solutions in the optimal case                              | 59        |
| 3.5 Maximal regularity of solutions in the general case                              | 64        |
| 3.6 Some results of Trotter and Kato type  | 69        |
| 3.7 Applications   | 73        |

|  |            |
|--|------------|
| <b>Chapter IV. Degenerate equations of parabolic type, II: The non autonomous case</b>                         | <b>91</b>  |
| 4.1 The fundamental solution to $\frac{du}{dt} \in A(t)u + f(t)$   | 91         |
| 4.2 Maximal regularity of solutions to $\frac{du}{dt} \in A(t)u + f(t)$  | 100        |
| 4.3 Degenerate evolution equations   | 105        |
| 4.4 Degenerate equations of the form $\frac{d}{dt}t^\ell v = Lv + f(t)$ and $t^\ell \frac{du}{dt} = Lu + f(t)$ | 111        |
| 4.5 Applications   | 115        |
| 4.6 The operator equation $\mathcal{T}Mv - \mathcal{L}v = f$ : Some extensions                                 | 121        |
| <b>Chapter V. Degenerate equations: The general case</b>   | <b>127</b> |
| 5.1 The operational equation $\mathcal{T}Mv - Lv = f$ : The general case                                       | 128        |
| 5.2 The equations $\frac{d}{dt}Mv - Lv = f(t)$ and $M\frac{du}{dt} - Lu = f(t)$ : The general case             | 132        |
| 5.3 Applications   | 136        |
| 5.4 The Gevrey case  | 147        |
| 5.5 Abstract potential operators   | 153        |
| 5.6 The case of $\lambda = 0$ an isolated singular point of $(\lambda L - M)^{-1}$                             | 157        |
| 5.7 Equations of higher order in time  | 162        |
| 5.8 Integrated solutions to implicit differential equations  | 167        |
| 5.9 Some further results on convergence of solutions   | 174        |
| <b>Chapter VI. Degenerate differential equations of the second order</b>                                       | <b>181</b> |
| 6.1 Equations of parabolic type  | 181        |
| 6.2 Examples   | 197        |
| 6.3 Equations of hyperbolic type   | 210        |
| 6.4 Equations of hyperbolic type (continued)   | 221        |
| 6.5 Abstract elliptic equations  | 225        |
| 6.6 Abstract elliptic-hyperbolic equations   | 227        |
| <b>Chapter VII. Degenerate parabolic equations: Some alternative approaches</b>                                | <b>237</b> |
| 7.1 Generation theorems for $\alpha u''$   | 237        |
| 7.2 Generation theorems for $\alpha u'' + \beta u'$ : A first approach   | 257        |
| 7.3 Generation theorems for $\alpha u'' + \beta u'$ : Other approaches   | 268        |
| 7.4 Differential operators on $(0, \infty)$  | 283        |

|                                |            |
