Preface	iii
List of Illustrations	xi
List of Tables	xii
List of Programs	xv
1. INTRODUCTION	1
1.1 Introductory Remarks	1
1.2 An Overview of Skewed Distributions	2
1.3 Parameter Estimation	7
1.4 Some Comparisons	8
2. BASIC CONCEPTS FOR THE ANALYSIS OF RELIABILITY AND LIFE DISTRIBUTION DATA	14
2.1 Life Distributions and Reliability	14
2.2 Discrete Models	17
3. THE WEIBULL, EXPONENTIAL, AND EXTREME VALUE DISTRIBUTIONS	25
3.1 Background	26
3.2 Characteristics of the Weibull Distribution	26
3.3 Maximum Likelihood Estimation	27
3.4 Moment Estimators	31
3.5 Modified Moment Estimators	32
3.6 Wycoff, Bain, Engelhardt, and Zanakias Estimators	44
3.7 Special Cases: Shape Parameter δ Known	46
3.8 Errors of Estimates	46
3.9 The Exponential Distribution	49
3.10 The Extreme Value Distribution	51
3.11 Illustrative Examples	54
3.12 Reflections	58

4. THE LOGNORMAL DISTRIBUTION	59
4.1 Introduction	59
4.2 Some Fundamentals	59
4.3 Moment Estimators	61
4.4 Maximum Likelihood Estimators	62
4.5 Asymptotic Variances and Covariances	64
4.6 Modified Moment Estimators	66
4.7 Illustrative Examples	74
4.8 Reflections	76
5. THE INVERSE GAUSSIAN DISTRIBUTION	77
5.1 Background	77
5.2 The Probability Density Function	78
5.3 Maximum Likelihood Estimation	79
5.4 Asymptotic Variances and Covariances	81
5.5 Moment Estimators	84
5.6 Modified Moment Estimators	84
5.7 Illustrative Examples	90
5.8 Reflections	92
6. THE GAMMA DISTRIBUTION	93
6.1 Background	93
6.2 The Density Function and Its Characteristics	94
6.3 Moment Estimators	94
6.4 Maximum Likelihood Estimators	95
6.5 Asymptotic Variances and Covariances	99
6.6 Modified Moment Estimators	101
6.7 Illustrative Examples	107
6.8 Reflections	109
7. CENSORED SAMPLING IN THE EXPONENTIAL AND WEIBULL DISTRIBUTIONS	110
7.1 Introduction	110
7.2 Progressively Censored Samples	111
7.3 Censored Samples from the Exponential Distribution	113
7.4 Censored Samples from the Weibull Distribution	115
7.5 The Hazard Plot	118
7.6 Estimate Variances and Covariances	122
7.7 An Illustrative Example	123
8. CENSORED AND TRUNCATED SAMPLES FROM THE NORMAL AND THE LOGNORMAL DISTRIBUTIONS	127
8.1 Introductory Remarks	127
8.2 Maximum Likelihood Estimation	127
8.3 Modified Maximum Likelihood Estimators for Lognormal Parameters Based on Censored Samples	130

8.4	Maximum Likelihood Estimation in the Normal Distribution	132
8.5	An Illustrative Example from a Lognormal Distribution	163
9.	CENSORED SAMPLING IN THE INVERSE GAUSSIAN AND GAMMA DISTRIBUTIONS	166
9.1	Introduction	166
9.2	Censored Sampling in the Inverse Gaussian Distribution	166
9.3	A Pseudocomplete Sample Technique	171
9.4	Censored Sampling in the Gamma Distribution	173
9.5	An Illustrative Example	178
10.	THE RAYLEIGH DISTRIBUTION	181
10.1	Introduction	181
10.2	Maximum Likelihood and Moment Estimation in the p -Dimensional Distribution	182
10.3	Special Cases	183
10.4	Complete Sample Estimators When $p = 1, 2$, and 3	187
10.5	Two-Parameter Rayleigh Distribution	187
10.6	Estimation in the Two-Parameter Rayleigh Distribution	188
10.7	Truncated Samples	191
10.8	Censored Samples	196
10.9	Reliability of Estimates	201
10.10	Illustrative Examples	203
10.11	Parameter Estimation in the Two-Parameter Rayleigh Distribution of Dimension 2, When Samples Are Censored	204
10.12	Some Concluding Remarks	206
11.	THE PARETO DISTRIBUTION	207
11.1	Introduction	207
11.2	Some Fundamentals	207
11.3	Parameter Estimation from Complete Samples	212
11.4	Parameter Estimation from Truncated Censored Samples	215
11.5	Reliability of Estimates	217
11.6	An Illustrative Example	219
12.	THE GENERALIZED GAMMA DISTRIBUTION	220
12.1	Introduction	220
12.2	Parameter Estimation in the Three-Parameter Distribution	223
12.3	The Four-Parameter Distribution	235
12.4	Estimate Variances and Covariances	241

x / CONTENTS

12.5	Simplified Computational Procedures for the Modified Moment Estimators	246
12.6	Illustrative Examples	265
12.7	Censored Samples	267
12.8	Asymptotic Variances and Covariances of Maximum Likelihood Estimators	282
12.9	An Illustrative Example	286
12.10	Some Comments and Recommendations	287
APPENDIX A.1 SOME CONCLUDING REMARKS		288
A.2 FURTHER COMPARISONS		289
A.3 TABLES OF CUMULATIVE DISTRIBUTION FUNCTIONS		291
A.4 COMPUTER PROGRAMS		341
Glossary		368
Bibliography		374
Index		387
