

CONTENTS

LIST OF PLATES	11
CHAPTER I. THE USE AND CONSTRUCTION OF MODELS	
1.1. What is a Model ?	13
1.2. The Use of Models	14
1.3. Materials for Models	15
CHAPTER II. MODELS IN PLANE GEOMETRY	
2.1. Dissections	19
2.2. The Circle	27
2.3. Circular Functions	30
2.4. Loci and Envelopes	31
2.5. Curve-stitching	44
2.6. Roulettes and Involutives	46
2.7. Paper-folding	55
2.8. Knots	56
2.9. Plane Tessellations	59
2.10. Curves as Limits of Polygonal Sequences	65
2.11. Golden Section	68
2.12. Some Miscellaneous Curves and Figures	71
CHAPTER III. POLYHEDRA	
3.1. Introduction	76
3.2. Duality	78
3.3. Materials and Construction	79
3.4. Colouring Polyhedra	82
3.5. The Five Regular Platonic Polyhedra	83
3.6. The Kepler-Poinsot Polyhedra	89
3.7. The Archimedean Polyhedra	100
3.8. Dual Solids	116
3.9. Stellated Archimedean Polyhedra	123
3.10. Regular Compounds	129
3.11. Deltahedra	142
3.12. Unitary Construction	145

3.13. The Stellations of the Rhombic Dodecahedron	149
3.14. Plaiting	152
3.15. Miscellaneous	157
CHAPTER IV. OTHER MODELS IN SOLID GEOMETRY	
4.1. Wire Models	161
4.2. Wooden Models	166
4.3. Quadric Surfaces	169
4.4. Ruled Surfaces	175
4.5. Möbius Strips	191
4.6. One-sided Surfaces and the Klein Bottle	193
4.7. Sphere-packs	195
4.8. Methods of Modelling Surfaces	197
4.9. Puzzles	202
CHAPTER V. MECHANICAL MODELS	
5.1. Models in Mechanics	208
5.2. Models in Statistics	216
5.3. Plane Linkages	220
5.4. Linkages in Three Dimensions	235
5.5. Machines for Drawing Curves	241
CHAPTER VI. MODELS FOR LOGIC AND COMPUTING	
6.1. Logical Devices	254
6.2. Punched Cards	258
6.3. Electric Circuits	260
6.4. Binary Addition	263
6.5. Analogue Computers	266
6.6. Conclusion	277
BIBLIOGRAPHY	279
INDEX	281
