

TABLE OF CONTENTS

	Page
ACKNOWLEDGEMENTS	III
TABLE OF CONTENTS	V
LIST OF SYMBOLS	VIII
ABSTRACT	XI
1. INTRODUCTION	1
1.1 Fiber Reinforced Plastics (FRP)	1
1.2 The Objective of the Present Study	5
2. REVIEW OF LITERATURE	6
3. ANALYTICAL CONSIDERATIONS	11
3.1 Linear Elastic Constitutive Equations	11
3.2 Classical Lamination Theory	15
3.3 Constitutive Relations of Transversely Isotropic Media	17
3.3.1 Octahedral Shear Stress	22
3.4 Linear Viscoelastic Behavior	24
3.4.1 The Rheological Model for Creep	26
3.5 Nonlinear Viscoelastic Behavior	27
3.5.1 The Method of Multiple Integral	28
3.5.2 Findley Approach to Nonlinear Viscoelasticity	29

3.5.3 Method of Nonlinearity Factors	30
3.6 Principal Creep Compliances of Orthotropic Materials	31
4. MICROMECHANICAL ANALYSIS	34
4.1 Micromechanical Model	34
4.2 Calculation of Average Stresses in the Unit Cell	39
4.3 Determination of Continuity Conditions	42
4.4 Calculation of Average Strains in the Unit Cell	44
5. ESTIMATION OF THE VISCOELASTIC PARAMETERS	55
5.1 Analytical Methods	55
5.1.1 Estimation of Bounds on the Elastic/Viscoelastic Moduli	55
5.1.2 Computation of the Elastic/Viscoelastic Moduli by Mori-Tanaka Approach	75
5.2 The Homogenized Viscoelastic Coefficients	88
5.2.1 Basic Principles of Homogenization Method	88
5.2.2 Macroscopic Equations	93
5.2.3 Evaluation of Homogenized Coefficients	99
5.2.4 Evaluation of Homogenized Coefficients for FRP	105
5.3 Finite Element Procedures	112
5.3.1. FEM Models Used	112
5.3.2. Evaluation of the Elastic/Viscoelastic Parameters - Plane Strain	118
5.3.3. Evaluation of the Elastic/Viscoelastic Parameters for a 3-D Model	121

6. EXPERIMENTAL PROCEDURES	124
6.1 Testing Facility	124
6.2 Materials and Specimens	129
6.3 Testing Program	130
7. RESULTS AND DISCUSSION	132
7.1 Experimental/Theoretical Results	132
7.2 0-degree Specimen	133
7.3 Pure Resin Specimen	134
7.4 90-degree Specimen	135
7.5 45-degree Specimen	136
7.6 General	137
8. SUMMARY AND CONCLUSION	157
APPENDICES	160
A. Nonlinear Viscoelastic Constitutive Equations	161
B. Determination of Linear Material Parameters Using "Mixed" Iteration	164
C. Relations Between Elastic Coefficients	170
D. Eshelby's Transformation Tensor for an Elliptic Cylinder	175
REFERENCES	178
