

INHALT DER 12. LIEFERUNG

HARTWIG LATOCHA: South America: Some general problems	9
I. Introduction	9
II. The antiquity of man in South America	9
III. Linguistic classification of the autochthon population	11
IV. The cultural situation during the period of European immigration	13
V. Demographic estimations for the 15th and 20th century	17
VI. Post-colombian changes and the present-day situation	19
References	21
CLAUDINE SAUVAIN-DUGERDIL: The biological diversity of the human populations of Central America	23
I. Introduction	23
1. Preliminary considerations	23
2. Geographical setting	23
II. History of human settlement	25
1. Introduction	25
2. Origins	26
3. Diversification	28
3.1. The Maya World	28
3.1.1. Outline of the fate of the Maya World	30
3.1.2. The biology of the Ancient Maya	36
3.2. Lower Central America	37
4. Post-conquest population process	40
5. Present-day populations	42
III. Bio-Anthropology of the present-day population	46
1. Introduction: demographic trend and its main determinants	46
2. Morphology	47
2.1. Anthropometry	47
2.2. Dermatoglyphics	52
2.3. Other quantitative traits	53
2.3.1. Skin reflectance	53
2.3.2. Dental variation	53
2.4. Conclusions	53
3. Genetic polymorphisms	54
3.1. General considerations: value and limits of the available information	54
3.2. Main serological characteristics	54
3.3. Discussion	61
IV. Conclusions	61
1. History of human settlement and biological diversity	61
2. Ecology and biological diversity	62
3. Demography and biological diversity	63
4. Socio-cultural factors and biological diversity	63
5. Implications	64
References	65

ILSE SCHWIDETZKY: The Caribbean Islands	81
I. Introduction	81
II. Population history	84
1. Prehistory and Indian human remains	84
2. Conquista, slave import and the vanishing of the Indian population.....	86
III. The population of today	88
1. The Greater Antilles.....	88
1.1. Cuba.....	88
1.2. Jamaica	90
1.3. Haiti.....	91
1.4. Puerto Rico	92
2. Some lesser Antilles	94
2.1. Virgin Islands.....	94
2.2. St. Bartholomé.....	94
2.3. Dominica.....	96
2.4. Martinique	96
2.5. Barbados	97
2.6. St. Vincent	98
2.7. Trinidad.....	98
IV. Summary and conclusions	99
References.....	100
 ADELAIDE G. DE DIAZ UNGRIA: The North: Colombia, Venezuela, the Guayanas	105
I. Introduction	105
II. Prehistoric populations.....	107
1. Cultural development.....	107
2. Human remains	109
3. After the Conquista	111
III. Recent populations	113
1. Demography.....	113
2. Anthropometry and morphology.....	115
3. Genetic Polymorphisms.....	122
4. Dermatoglyphics	126
5. Correspondence between distances based on different sets of characters.....	127
IV. Summary and conclusions	128
References.....	129
 FRANCISCO M. SALZANO: Brazil.....	137
I. Introduction	137
II. The original stocks	139
1. Indians	139
1.1. The peopling of America.....	139
1.2. Chronology	140
1.3. Brazilian prehistory	140
2. The Portuguese and other Europeans	143

3. Modern Asiatics	144
4. Africans	145
III. Living populations	147
1. Indians	147
1.1. Demography	147
1.2. Morphology	148
1.3. Monogenic characteristics	154
2. Neo-Brazilians	156
2.1. Demography	156
2.2. Morphology	159
2.3. Monogenic characteristics and estimates of admixture	161
IV. Envoy	166
References	166
HILDA VIDAL VIDAL and ILSE SCHWIDETZKY: The Andean countries: Ecuador, Peru, Bolivia	
	177
I. Introduction	177
II. Population history	179
1. Preceramic period	179
2. The later periods: Ecuador	182
3. Peru and Bolivia before the Inca period	184
4. Populations of the Inca period	191
5. Population development following the conquista	197
III. Recent populations	200
1. The Andean countries in race classifications and maps	200
2. Anthropometry	201
3. Serological characters	205
4. Dermatoglyphics	207
5. Adaptation and evolution	209
IV. Summary and conclusions	211
References	212
FRANCISCO ROTHHAMMER: Biological population history of Continental Chile	
	219
I. Introduction	219
II. Population history	221
1. Anthropological prehistory	221
2. Biological affinities of prehistoric populations	223
III. Recent populations	226
1. Indian populations	226
2. The European, African and Asiatic immigrations	227
3. The present mixed Chilean population	233
References	235

MANFRED KUNTER: Population and racial history of Argentina, Uruguay and Paraguay.....	237
I. Introduction: The natural environment.....	237
II. Prehistoric and historic populations.....	239
1. Prehistory.....	239
2. The development of the Indian population since the 16th century.....	242
3. Research problems in the prehistoric physical anthropology of South America.....	246
4. The most ancient skeletal remains.....	247
5. Later skeletal remains.....	248
6. Regional and diachronic population differences.....	254
6.1. Patagonia.....	254
6.2. The Lowlands of the Northeast and the neighbouring regions.....	256
6.3. The Andean region.....	256
III. The structure of recent populations.....	258
1. Demographic and ethnographic bases.....	258
1.1. The demographic and ethnic structure of today's populations.....	258
1.2. Demographic data of the Indian populations of today.....	262
2. Race classifications.....	264
3. Somatometric characters.....	266
4. Somatoscopic characters.....	270
5. Dermatoglyphics.....	271
6. Dental research.....	273
7. Serological characters.....	274
8. Physical anthropological research on mestizos and europoid populations.....	280
IV. Conclusions.....	281
References.....	282
ILSE SCHWIDETZKY: Epilogue.....	292
PLATES.....	293
