

CONTENTS

<i>Preface to the First Edition</i>	ix
<i>Preface to the Second Edition</i>	xi
<i>List of Abbreviations</i>	xiii
Chapter 1 Biomolecules	1
1.1 Amino Acids, Peptides and Proteins	1
1.1.1 Amino Acids	2
1.1.2 Peptides and Proteins	7
1.2 Nucleic Acids	14
1.2.1 The Structure of Nucleic Acids	15
1.2.2 Synthesis of Proteins	20
1.3 Biomolecules in Analytical Chemistry	22
1.3.1 Classical Analytical Chemistry	22
1.3.2 Limitations of Classical Analytical Chemistry	23
1.3.3 Bioanalytical Chemistry	23
Summary	28
References	29
Chapter 2 Chromatography	31
2.1 The Principle of Chromatography	31
2.2 Basic Chromatographic Theory	33
2.3 Liquid Chromatography Techniques for Bioanalysis	36
2.3.1 Liquid Chromatography Instrumentation	37
2.3.2 Reversed-Phase Liquid Chromatography (RP-LC)	39
2.3.3 Hydrophilic Interaction Liquid Chromatography (HILIC)	41
2.3.4 Ion-Exchange Chromatography	43
2.3.5 Affinity Chromatography	47
2.3.6 Size Exclusion Chromatography (SEC)	49
Summary	53
References	53

Chapter 3 Electrophoresis	55
3.1 Principle and Theory of Electrophoresis	56
3.1.1 Electrophoretic Mobility	57
3.1.2 Joule Heating	58
3.1.3 Electroosmotic Flow (EOF)	58
3.1.4 Separation Efficiency and Resolution	62
3.2 Gel Electrophoresis (GE)	64
3.2.1 Instrumentation for Gel Electrophoresis	65
3.2.2 Modes of Gel Electrophoresis	70
3.2.3 Sodium-Dodecyl Sulfate — Polyacryl Amide Gel Electrophoresis (SDS-PAGE)	71
3.2.4 Isoelectric Focussing (IEF)	71
3.2.5 Two-Dimensional Gel Electrophoresis (2D-GE)	75
3.3 Capillary Electrophoresis (CE)	77
3.3.1 Capillary Electrophoresis Instrumentation	78
3.3.2 Capillary Zone Electrophoresis (CZE)	82
3.3.3 Capillary Isoelectric Focussing (CIEF)	83
3.3.4 Micellar Electrokinetic Chromatography (MEKC)	85
3.3.5 Capillary Gel Electrophoresis (CGE)	89
Summary	91
References	92
Chapter 4 Mass Spectrometry	93
4.1 The Principle of Mass Spectrometry	93
4.1.1 Ionisation	94
4.1.2 Mass Analyser	94
4.1.3 Detector	94
4.2 Matrix-Assisted Laser Desorption Ionisation — Time-of-Flight Mass Spectrometry (MALDI-TOF-MS)	95
4.2.1 Ionisation Principle	96
4.2.2 Mass Analysis in Time-of-Flight Analyser	96
4.2.3 Detection of Ions	100
4.2.4 Resolution	100
4.2.5 Sample Pre-treatment	101
4.2.6 Applications of MALDI	103
4.3 Electrospray Ionisation Mass Spectrometry (ESI-MS)	105
4.3.1 Ionisation Principle	106
4.3.2 ESI-Source and Interface	108
4.3.3 Quadrupole Analyser	109
4.3.4 Applications of ESI-MS	110
Summary	115
References	115

Chapter 5	Optical Spectroscopy	117
5.1	Absorption of UV and Visible Light	118
5.1.1	Basic Principles of Absorption Measurements	118
5.2	Fundamentals of Fluorescence Spectroscopy	120
5.2.1	Introduction to Fluorescence	120
5.2.2	Instrumentation	122
5.2.3	Fluorescence Parameters	123
5.2.4	Signal Intensity	126
5.2.5	Fluorophores and Labelling Strategies	128
5.2.6	Fluorescence Imaging	136
	Summary	140
	References	141
Chapter 6	Molecular Recognition in Immunoassays, Biosensors, DNA-Arrays and Pyrosequencing	143
6.1	Bioassays	144
6.1.1	Antibodies	145
6.1.2	Antigens	147
6.1.3	Antibody-Antigen-Complex Formation	148
6.1.4	Assay Formats	149
6.1.5	Home Pregnancy Test	154
6.1.6	Enzyme Immunoassays (EI and ELISA)	156
6.2	Biosensors	159
6.2.1	The Bioreceptor	160
6.2.2	The Transducer	162
6.2.3	Blood Glucose Sensor	163
6.3	DNA Binding Arrays	165
6.3.1	Principle of DNA-Arrays	166
6.3.2	Fabrication of DNA-Arrays	167
6.3.3	Development and Analysis of a DNA-Array	167
6.3.4	Sequencing of DNA with Arrays	168
6.3.5	Other Applications of DNA-Arrays	170
6.4	DNA Identification by Pyrosequencing	171
6.4.1	The Principle of Pyrosequencing	171
6.4.2	Sample Preparation and Instrumentation	174
6.4.3	Applications of Pyrosequencing	175
	Summary	175
	References	176

Chapter 7 Nucleic Acid Analysis	177
7.1 Extraction and Isolation of Nucleic Acids	178
7.1.1 CsCl Density Gradient Centrifugation	178
7.1.2 Total Cellular DNA Isolation	179
7.1.3 RNA Isolation — the Proteinase K Method	179
7.2 Nucleic Acid Amplification — the Polymerase Chain Reaction (PCR)	180
7.2.1 The Principle of PCR	180
7.2.2 The Rate of Amplification During a PCR	183
7.2.3 Reagents for PCR	185
7.2.4 Real-Time PCR	187
7.2.5 Reverse Transcriptase — PCR (RT-PCR)	189
7.3 Nucleic Acid Sequencing	190
7.3.1 The use of Restriction Enzymes in Sequencing	190
7.3.2 The Chemical Cleavage Method (Maxam–Gilbert Method)	192
7.3.3 The Chain Terminator Method (Sanger or Dideoxy Method)	197
7.4 RNA-Sequencing	200
Summary	200
References	201
Chapter 8 Protein Analysis	203
8.1 Protein Sequencing Strategy	204
8.2 End-Group Analysis	204
8.2.1 N-terminal Analysis (Edman Degradation)	205
8.2.2 C-terminal Analysis	206
8.3 Disulfide-Bond Cleavage	210
8.4 Separation and Molecular Weight Determination of the Subunits	211
8.5 Amino Acid Composition	211
8.6 Cleavage of Specific Peptide Bond	214
8.6.1 Enzymatic Fragmentation	215
8.6.2 Chemical Fragmentation Methods	218
8.7 Sequence Determination	218
8.8 Ordering of Peptide-Fragments	220
8.9 Determination of Disulfide Bond Positions	220
8.10 Protein Sequencing by Mass Spectrometry	222
Summary	222
References	223
<i>Index</i>	225
