<i>Introduction</i>	xv
1 The project of a science of language	1
1.1 Grammar as a domain of inquiry	1
1.2 Cartesian linguistics, 1637–1966	4
1.3 Ancient India	15
1.4 The Modistic viewpoint	23
1.5 Conclusions	33
2 Before there was grammar	35
2.1 Overview	35
2.2 Where semantics begins	37
2.3 Lexicalization: the creation of the lexical atom	47
2.4 Concepts ↔ intentionality ↔ intensionality ↔ grammar ↔ reference	53
2.5 Parts of speech and their grammatical semantics	59
2.6 The modes of signifying reloaded	69
2.7 Conclusions	73
3 The content of grammar	75
3.1 Grammar as relational	75
3.2 From parts of speech to the sentence	80
3.3 Content from composition?	88
3.4 Content from the interface?	95
3.5 The phase as the smallest unit of grammatical organization	101
3.6 The absence of X-within-X in language (with Boban Arsenijević)	110
3.7 Conclusions	115
4 Deriving the formal ontology of language	117
4.1 The grammar of reference	117
4.2 The Topological Mapping Theory (TMT)	119
4.3 Extending the TMT	130
4.4 Extending the Extended TMT (with Txuss Martín)	139
4.4.1 From 3rd-person object reference to pronouns	139
4.4.2 Reference and Person	144
4.4.3 Semantic approaches to the essential indexical	149

4.4.4	The hierarchy of reference revealed through Romance object clitics	153
4.4.5	Summary	172
4.5	Conclusions	173
5	Cross-linguistic variation	175
5.1	The apparent problem of linguistic variation	175
5.2	Linguistic variation vs. grammatical variation	178
5.3	Diagnosing grammatical variation	181
5.4	Revisiting the head parameter	184
5.5	Revisiting the null subject parameter	193
5.6	Revisiting the alignment parameter	197
5.7	Conclusions	201
6	The rationality of Case	202
6.1	The apparent irrationality of Case	202
6.2	What do the Cases <i>mean</i> ?	204
6.3	Vergnaud's conjecture and 'abstract Case'	211
6.4	The Case filter, reference, and Tense	218
6.5	Event mereology and Case	223
6.6	Conclusions	236
7	Language and speciation	238
7.1	Why linguistics is biology	238
7.2	Language evolution in a new key	240
7.3	The speciation of modern <i>Homo sapiens</i>	250
7.4	Conclusions	260
8	Bilingualistic variation	262
8.1	Questioning double dissociations in developmental language disorders	263
8.2	Thought in genetically normal language-less or language-impaired adults	266
8.3	Thought without the linguistic genotype	275
8.4	Variation in the linguistic genotype	279
8.5	Formal thought disorder and the de-integration of grammar	285
8.6	Grammatical meaning in the brain	292
8.7	Conclusions	295
9	Thought, language, and reality	296
9.1	The nature of semantics	297
9.2	How can it be that truth is a grammatical concept?	304

9.3 The grammar of truth: a unified account	311
9.4 The limit of grammar and the limits of thought	317
9.5 Language and reality	322
9.6 Is there a science of thought?	328
9.7 Conclusions	336
<i>References</i>	339
<i>Index</i>	375
