

# Table of contents

## Foreword

## Opening lecture

<b>Modular systems in MST for medical applications.....</b>	<b>1</b>
W. Menz, W. Bacher, W. K. Schomburg	

## Design & modeling

<b>Software tools for electromagnetic compatibility on board level .....</b>	<b>4</b>
A. Franchois, R. De Smedt, K. Allaert	

<b>Design and characterization of RF-circuits in multilayer MCM substrates.....</b>	<b>8</b>
H. Rekonen, A. Perttula, A. Tervonen, P. Barnwell, G. Shorthouse	

<b>The use of integrated resistors and buried capacitance in high.....</b>	<b>11</b>
<b>performance telecom printed circuit boards</b>	
J. Peeters, E. Roose, L. Vandam, A. Ackaert, K. Allaert, L. Van den Torren, L. Martens	

<b>A simplified approach for the environmental assessment of.....</b>	<b>15</b>
<b>populated printed circuit boards</b>	
N. F. Nissen, A. Middendorf	

## Joining

<b>An overview of polymeric electronics packaging using conductive.....</b>	<b>19</b>
<b>adhesives</b>	
J. Liu	

<b>Development of an adhesive TAB joining technology .....</b>	<b>24</b>
J. Vanfleteren, A. Van Calster, K. Sabbe, M. De Caluwé, A. Dravet, P. Kertesz, S. Sécher, K. Deckelmann, J. Wiese, E. Cortés, M. Lopez, G. Schols, K. Allaert, P. Vetter, M. Forrest	

<b>Conductive adhesive joints with non-conductive adhesives for small-.....</b>	<b>27</b>
<b>pitch SMT-applications</b>	
A. Bauer, H. Oeverdiek, T. Gesang, H. Schäfer	

<b>Electrically conductive adhesive joints with nonfilled adhesives .....</b>	<b>30</b>
H. Schäfer, G. Wiegmann, O.-D. Hennemann	

## **Flip-chip & area array**

- Flip-chip integration in standard SMT assembling processes**.....33  
H. Richter, M. Florjancic, W. Heck, T. Schlee, A. Löhnert
- Flip-chip bonding investigations on the self-alignment of tin-lead bumps under vacuum conditions**.....37  
J. F. Kuhmann, H.-J. Hensel, H.-G. Bach
- Si circuit chip joining technology using Ar atom bombardment**.....41  
A. Kohno, Y. Sasaki, M. Horino, M. Usami, M. Tokuda, K. Sahara
- Flip-chip technology for chip-on-glass applications (LCD)**.....47  
D. Wojciechowski, A. Van Calster, M. Vrana, J. De Baets, M. De Caluwé, P. Bosch
- Flip-chip bonding with solder-filled anisotropic adhesive** .....51  
P. Savolainen, J. Kivilahti

## **Materials and interfaces**

- Organic versus non-organic substrates for R. F. applications** .....54  
C. Drevon
- The impact of thermoplastic substrates on soldering of electronic products**.....58  
K. Feldmann, M. Gerhard
- Sn-Ag-Ga, a possible lead-free solder alloy**.....65  
K. Fritz, S. Wege, Kh. G. Schmitt-Thomas
- Stability of grain structure and grain boundary distribution in 1-D and 2-D metallic systems**.....69  
V. G. Sursaeva, T. V. Tatzij, L. S. Shvindlerman, R. G. Faulkner

## **MS-packaging & optical integration**

- Techniques for optoelectronic interconnections** .....73  
M. Leppihalme, S. Honkanen
- Self-aligned packaging of multi-channel photodiode array module using AuSn solder bump flip-chip bonding**.....75  
M. Itoh, I. Yoneda, J. Sasaki, H. Honmou, K. Fukushima, T. Nagahori
- High precision LIGA structures for optical fibre-in-board technology**.....77  
A. Picard, W. Ehrfeld, J. Reinhardt, D. Morlion,  
J. Vandewege, P. J. Vetter
- Wafer through-hole interconnections for high vertical wiring densities** .....81  
C. Christensen, S. Bouwstra, J. W. Petersen, P. Kersten

## **MCMs**

- Issues and opportunities in thin film MCM**.....83  
E. Beyne
- High power 3D MCM-V modules**.....88  
A. Coello-Vera, L. Albo, P. Pipard, M. Masgrangeas
- MCM introduction scenarios for B-ISDN**.....91  
W. Temmerman, R. De Bondt, A. Ackaert, K. Allaert, M. Forrest
- MCM-L packaging: Technology for die and SMD components under the same overcoating**.....95  
P. Clot, J.-F. Zeberli

## Reliability

- Reliability analysis techniques for electronic equipment and systems**.....99  
A. Birolini
- Fracture electronics – fracture problems in electronic packaging**.....106  
B. Michel, A. Schubert, J. Villain
- Deformation measurements at components, printed wiring boards  
and microelectronic assemblies to ensure the reliability of a system**.....108  
T. Ahrens, M. Krumm
- Damage and micro-crack evolution in SMT solder joints**.....112  
K. Heiduschke, L. Weber, A. Birolini
- Reliability of displaced solder joints**.....116  
K. Halser

## Wire bonding

- Wire bonding for future requirements** .....119  
K.-D. Lang
- Frequency characteristics of ultrasonic wire bonding** .....125  
– high frequency ultrasonic wire bonding  
J. Tsujino
- Investigations on the damage mechanism of aluminium wire bonds  
used for high-power applications**.....128  
M.-H. Poech, K. J. Dittmer, D. Gäbisch
- Optimization of the ball-wedge bonding process for use of thick  
wires on non-precious metal basis**.....132  
H. Fritzsche, E. Meusel, U. Draugelates, T.-U. Trapp
- Analytical methods to characterise the interconnection quality  
of gold ball bonds** .....135  
A. Carrass, V. P. Jaecklin

## Poster contributions

<b>Radiated emission of PCB tracks</b> .....	140
P. De Langhe, F. Olyslager, A. Franchois, D. De Zutter, K. Allaert	
<b>The structures of laser-beam soldered microjoints with RS solders</b> .....	143
L. Dorn, F. Herbert, F. Hofmann, S. Jafari, H. Sodeik	
<b>High frequency characterization of laser-CVD deposited aluminum lines</b> .....	146
D. Metzger, A. Loppnow, A. Owzar, H. Reichl	
<b>Temperature dependence of solder paste adhesion</b> .....	149
M. Nowotnick, K. Wittke, M. Kising, H. Bell, A. Woock	
<b>Study of adhesion of molding compounds on differently treated copper surfaces</b> .....	151
A. Scandurra, R. Zafarana, A. Grasso, B. Pelligra, G. F. Indelli	
<b>Evaluation of wettability and behaviour of the solder-flux-system</b> .....	156
Kh. G. Schmitt-Thomas, J. Schurig, H. Höniger	
<b>"Right-first-time" MCM design</b> .....	159
O. Zorba	
<b>Fully automatic calculation of die-attach voids</b> .....	162
U. E. Frank	
<b>Groundrules for reliability improvement of IGBT power module packaging</b> .....	163
P. Jacob, M. Held, P. Scacco	
<b>Investigations on low-stress COB-packaging</b> .....	166
W. Schneider	
<b>Reliability prediction of wire bonding</b> .....	168
V. Tiederle	
<b>Interconnection by laser induced metal deposition from liquid solutions</b> .....	171
A. Gillner, M. Wehner
