|                                                                                              |      |
|----------------------------------------------------------------------------------------------|------|
| EDITORIAL PREFACE                                                                            | v    |
| FOREWORD                                                                                     | xiii |
| I. THE SEMANTIC PROBLEM—SOURCES AND THEMES                                                   | 1    |
| II. THE CONCEPT OF SEMANTICS AND PREREQUISITES<br>FOR THE INVESTIGATION OF SEMANTIC PROBLEMS | 10   |
| 1. The Concepts of Object Language and Metalanguage                                          | 11   |
| 2. The Semantic Level of Analysis and its Relations to the<br>Syntactic and Pragmatic Levels | 15   |
| III. SEMANTIC CONCEPTS                                                                       | 31   |
| 1. Semantic Concepts and their Relations in Common<br>Parlance                               | 31   |
| A. Express, state that                                                                       | 31   |
| B. Signify                                                                                   | 35   |
| C. Denote                                                                                    | 41   |
| D. Represent                                                                                 | 42   |
| 2. Semantic Concepts in Formalised Languages                                                 | 43   |
| A. The Concept of a Formalised Language                                                      | 43   |
| B. The Interpretation of a Formalised Language                                               | 47   |
| C. The Introduction of Semantic Concepts by Definition                                       | 50   |
| D. The Axiomatic Introduction of Semantic Concepts                                           | 57   |
| IV. THE SEMANTICS OF LOGICAL CONCEPTS                                                        | 61   |
| 1. Problems of L-Semantics                                                                   | 62   |
| A. The Introduction of L-Concepts as Non-Defined<br>Terms                                    | 64   |
| B. The Concepts of 'Logical Range' and 'State Des-<br>cription'                              | 66   |
| C. The Concepts of 'Logical Content' and 'Semantic<br>Information'                           | 74   |
| D. Meaning Postulates                                                                        | 83   |

|                                                                                                 |     |
|-------------------------------------------------------------------------------------------------|-----|
| 2. The Semantics of Logical Concepts on the Basis of the Concept of Interpretation              | 91  |
| A. The Concepts of Model and Interpretation                                                     | 93  |
| B. The Most Important Definitions of Logical Semantic Concepts on the Basis of 'Interpretation' | 97  |
| C. The Concept of 'Translation'                                                                 | 100 |
| <br>V. SENSE AND DENOTATION                                                                     | 103 |
| 1. Frege's Conception of Sense and Denotation                                                   | 103 |
| A. Sense, Denotation and the Identity of Names                                                  | 103 |
| B. The Concept of 'Name'                                                                        | 108 |
| C. Frege's Extension of the Semantic Characterisation of Names                                  | 111 |
| 2. The Theory of Descriptions                                                                   | 114 |
| A. The Concept of Denoting Phrase                                                               | 115 |
| B. The Differentiation of Descriptions                                                          | 117 |
| C. Individual Descriptions and Statement Functions                                              | 118 |
| 3. The Method of Extension and Intension                                                        | 122 |
| A. The Concepts of 'Class' and 'Property'                                                       | 123 |
| B. The Concepts of 'Extension' and 'Intension'                                                  | 128 |
| C. Extensional and Intensional Context                                                          | 134 |
| D. A Possible Amplification of the Method of Extension and Intension                            | 138 |
| 4. The Problem of Naming                                                                        | 143 |
| A. The Name Relation                                                                            | 143 |
| B. Antinomies of the Name Relation                                                              | 149 |
| 5. Synonymy                                                                                     | 151 |
| A. The Concept of 'The Same Meaning'                                                            | 151 |
| B. Synonymy, Intension and Intensional Isomorphism                                              | 155 |
| C. Synonymy, Pragmatic Intension and Pragmatic Criteria                                         | 158 |
| <br>VI. THE CRITERION OF SENSE                                                                  | 166 |
| 1. The Formulation of the Problem                                                               | 166 |
| A. Conceptions of a Criterion of Sense                                                          | 166 |
| B. The Criterion of Sense and the Problem of Linguistic and Sense Intension                     | 167 |
| 2. The Operationist Criterion of Sense                                                          | 170 |
| A. Einstein's Definition of Simultaneity and the Operationist Criterion of Sense                | 171 |

|                                                                                        |     |
|----------------------------------------------------------------------------------------|-----|
| B. Critical Comments on the Operationist Criterion of Sense                            | 172 |
| 3. The Verifiability Criterion of Sense                                                | 177 |
| A. Motives for the Original Version of the Verifiability Criterion                     | 177 |
| B. Different Degrees of the Verifiability Criterion                                    | 183 |
| C. The Logical Nature of the Verifiability Criterion                                   | 186 |
| 4. The Translatability Criterion of Sense                                              | 187 |
| A. The Concept of 'Having a Sense' as a Primitive Concept of the Semantic Metalanguage | 187 |
| B. Pragmatic Limitations of the Translatability Criterion                              | 189 |
| C. The Concept of 'Having a Sense' as a Many-Place Predicate                           | 192 |
| 5. Sense and the Empirical                                                             | 194 |
| A. The Concept of 'Empirical Predicates'                                               | 194 |
| B. Dispositional Predicates                                                            | 198 |
| 6. 'Theoretical Concepts' and the Relativity of the Empirical Starting Point           | 202 |
| A. The Problem of Scientific Empiricism                                                | 202 |
| B. The Admissibility of Theoretical Concepts                                           | 208 |
| C. Ways of Interpreting Theoretical Concepts                                           | 210 |
| 7. Problems of Sense and Reduction Procedures                                          | 217 |
| A. A Critique of Empiricist Reductionism                                               | 217 |
| B. The Ontological Aspect of Reduction; the Theory of Levels                           | 220 |
| C. The Semantic and Pragmatic Aspects of Reduction                                     | 224 |
| VII. VAGUENESS                                                                         | 229 |
| 1. Vagueness and the Un-Sharpness of Boundaries                                        | 229 |
| A. Vagueness and the Empirical                                                         | 230 |
| B. Vagueness and Theoretical Concepts and Constructions                                | 232 |
| C. Vagueness and the So-Called Fringe                                                  | 233 |
| 2. Sources of Vagueness and Ways of Analysing Vagueness                                | 235 |
| A. The Pragmatic Aspects of Vagueness                                                  | 235 |
| B. The Semantic Aspects of Vagueness                                                   | 239 |
| 3. Vagueness, Ambiguity and Denotational Opacity                                       | 242 |
| A. Ambiguity                                                                           | 242 |
| B. Denotational Opacity                                                                | 243 |
| C. Extremes and Graduated Differences                                                  | 244 |

|       |                                                                                                     |     |
|-------|-----------------------------------------------------------------------------------------------------|-----|
| VIII. | SEMANTICS AND SOME PROBLEMS OF ONTOLOGY                                                             | 247 |
| 1.    | Semantics and Ontic Decision                                                                        | 247 |
| A.    | The Use of Terms and Ontic Commitments                                                              | 248 |
| B.    | Linguistic Framework and So-Called External and Internal Questions                                  | 251 |
| 2.    | Nominalism, Platonism and Semantics                                                                 | 255 |
| A.    | The Reification of Abstract Entities and the Problem of Nominalism                                  | 255 |
| B.    | 'Praeter Necessitatem'                                                                              | 257 |
| C.    | The Problem of Similarity and Identity                                                              | 260 |
| 3.    | Analytical and Synthetic Aspects in the Language of Science                                         | 265 |
| A.    | The Traditional Problems and Tasks of Semantics                                                     | 265 |
| B.    | Degrees of Analyticity                                                                              | 267 |
| C.    | Some Methodological Problems                                                                        | 270 |
| IX.   | AN OUTLINE OF THE EVALUATION OF THE RESULTS OF SCIENTIFIC ACTIVITY IN TERMS OF SEMANTIC INFORMATION | 274 |
| 1.    | The Scope for Evaluating Scientific Results                                                         | 274 |
| 2.    | Brillouin's Attempt at an Informational Evaluation of Scientific Laws                               | 277 |
| 3.    | Linguistic Devices in Tasks of the Systematising Type                                               | 280 |
| 4.    | The Concept of 'Decision Base' and the Evaluation of a Decision Base                                | 286 |
| 5.    | The Relevance of A Posteriori Data                                                                  | 293 |
| 6.    | Evaluation of the Goal Complex and the Concept of 'Epistemic Gain'                                  | 298 |
| X.    | THE SEMANTICS OF PREFERENCE ATTITUDES                                                               | 304 |
| 1.    | The Role of Preference and Preference Ordering                                                      | 304 |
| 2.    | The Comparability Principle as a Presupposition for the Construction of a Preference System         | 306 |
| 3.    | Preferences of Things and Preferences of States of Affairs                                          | 309 |
| 4.    | Preference 'Ceteris Paribus'                                                                        | 315 |
| 5.    | The Concept of 'Preferable States of Affairs' as a Qualitative Concept                              | 318 |
| 6.    | Preference as a Propositional Attitude                                                              | 321 |
|       | Conclusions                                                                                         | 323 |
