Introduction

v

PART I

INTRODUCTORY – THE NATURE OF SCIENCE

I. Introduction to the Philosophy of Physical Science	3
II. Science as a Language	13
III. What Physical Science Talks about	26

PART II

METHODOLOGICAL CONSIDERATIONS

IV. The Nature of Explanation	41
V. The Nature of Scientific Statements, Laws	57
VI. The Origination and Confirmation of Laws: The Principle of Induction	72
VII. Truth and Probability of Laws	88
VIII. Causal and Non-Causal Laws	103
IX. The Nature of Hypotheses	117
X. Confirmation by Experimentation	132
XI. The Structure of Theories	148

PART III

SEMANTICAL CONSIDERATIONS

XII. The Vocabulary of Physical Science	165
XIII. Meaning of Scientific Terms	180
XIV. The Semantics of 'Space'	196
XV. The Semantics of 'Time'	212
XVI. Relativity-Motion	225
XVII. Matter-Quantum Theory	241

PART IV

META-PHYSICAL CONSIDERATIONS

XVIII.	Causality	259
XIX.	Presuppositions of Science	274
XX.	Physics, Reality, and Perception	290
