

CONTENTS

<i>Introduction</i>	XV
<i>Preface</i>	XXI
PART I. STRUCTURE OF GENETIC PSYCHOLOGY AND GESTALT	
PSYCHOLOGY	1
CHAPTER 1. HISTORY OF EUROPEAN GENETIC PSYCHOLOGY . .	3
I. Phases of Genetic Psychology.	3
1. The German Phase and Northern Phase	6
2. The French Phase	9
3. The Psychological Theory of Claparède	11
II. Psychogenetic Method	14
CHAPTER 2. LOGIC AND PSYCHOLOGY.	22
I. Relationship Between Logic and Psychology	22
II. Operational Logic	30
1. Basic Concepts.	31
2. Elements	33
3. System	35
CHAPTER 3. PHENOMENA OF PERCEPTION. "WHY DO THINGS	
APPEAR AS THEY DO?"	42
I. The Gestalt Theory of Perception.	43
General Conclusion.	51
A Note on the Set Theory	54
II. The Genetic Theory of Perception	58
1. The Borderline Between Perception and Thinking	59
2. Partial Isomorphy between Perceptual Structures	
and Thought Structures.	60
3. Is Perception Genetically Prior to Thinking? . . .	62
4. Perception as Assimilation.	63
5. Hypothesis of Centratings	65
6. Hypothesis of Strategies	71
CHAPTER 4. PHENOMENA OF GENETIC PSYCHOLOGY (SCHOOL OF	
GENEVA)	73

I. Conception of Nature	74
Conclusion	77
II. Conception of Space	79
III. Conception of Time	86
Conclusion	92
Critical Remarks	93
IV. Conception of Causality	94
Critique.	96
V. Conception of Quality	97
1. Logical Conceptions	97
Conclusion	105
2. Analytic and Synthetic Conceptions.	105
VI. Conception of Quantity	107
Conclusion	111
Critical Remarks	112
VII. General Conclusion	114
CHAPTER 5. PSYCHOLOGY OF THOUGHT PROCESSES	117
I. The Gestalt Theory of Thinking	119
1. The Concept or Gestalt	120
2. Principle of Prägnanz.	120
3. Insight and Transposition Phenomena.	121
4. Principle of Reorganization	122
5. Principle of Direction.	124
6. Einstellung and E-Effect	125
7. Productive and Reproductive Thinking	125
8. Hypothesis of Psychophysical Isomorphism	126
9. Pathological Thought and Gestalt Theory	128
10. Conclusion: Critique of Modern Behaviorism.	129
II. The Genetic Theory of Thinking	136
1. Operation and Interiorization	137
2. Hypothesis of Genetic Levels.	140
3. Hypothesis of Strategies	146
4. Principle of Equilibrium	147
5. The Genetic Interpretation of Learning	149
6. Genetic Psychology and Psychoanalysis	154
7. Critique of the Genetic Theory of Thinking	159
CHAPTER 6. PSYCHOLOGY OF THOUGHT PROCESSES (continued)	166
I. Thought and Language	167

II. Morphology of Thought Processes	173
Types of Thought Processes	175
(I) The imagist type	176
(II) The conceptual type	181
(III) The hypothetical type	184
(IV) The speculative type	186
The Levels of Thought Processes	191
The Continuity of Thought Processes	194
Conclusion	199
PART II. PHILOSOPHIC FOUNDATIONS OF EMPIRICAL PSYCHOLOGY	205
CHAPTER 7. ANALYSIS OF BASIC CONCEPTS	207
I. Configuration	208
II. Abstraction	215
CHAPTER 8. METHODOLOGICAL FRAMEWORK OF PSYCHOLOGY .	220
I. Critique of Genetic Psychology (School of Geneva) . .	221
II. Qualitative and Quantitative Methods	226
III. Structure and Functions of Theories	231
Concluding Note	241
CHAPTER 9. EPISTEMOLOGICAL FRAMEWORK OF PSYCHOLOGY .	242
I. The Phenomena of Psychology	243
II. Is Psychology Reducible to Physiology?	251
Concluding Note	262
CHAPTER 10. PROLEGOMENON TO A REALISTIC PHILOSOPHY OF SCIENCE	263
I. Psychology as a Natural Science	264
II. Psychology of Science: "Gestalt Epistemology" and "Genetic Epistemology"	275
Gestalt Epistemology	276
Genetic Epistemology	282
Concluding Remarks	286
III. Philosophy of Science as the Morphology of Science .	286
The Concept of Phenomenological Spectrum	288
The Logical Structure of Science	295
Realism and Positivism	299
Conclusion	307
<i>General Bibliography</i>	310
<i>Index</i>	325
