<i>Foreword by James V. McGlynn, S.J.</i>	v
<i>Preface</i>	vii

PART ONE: THE PHILOSOPHY OF BEING

I. INTRODUCTION

1. Purposes and general ways of knowing	3
2. Kinds of theoretical knowledge	6
3. Characteristics of scientific knowledge	7
4. Why should I study philosophy?	12
5. The philosophy of being and the other parts of philosophy	15
6. Philosophy and religion	17
7. Thomistic philosophy	21
8. Definitions	22
9. Readings	25

II. THE MEANING OF "BEING"

10. Various senses of the word <i>real</i>	30
11. Phenomenalism and the meaning of <i>being</i>	32
12. Materialism and the meaning of <i>being</i>	33
13. Essentialism and the meaning of <i>being</i>	37
14. Existentialism and the meaning of <i>being</i>	41
15. The Thomistic answer to the question, "What is it to be real?"	42
16. The primitive notion of being	47
17. The metaphysical knowledge of being	50
18. The first principles of knowledge	54

19. Definitions	57
20. Summary of the argument	57
21. Readings	58
 III. THE ANALOGY OF BEING: FIRST APPROACH	
22. The fact of knowledge in common	64
23. Univocation and its basis	65
24. Is being a universal?	65
25. "Being" is common to many	67
26. The formal structure of analogy	69
27. Analogy of individual beings	71
28. Person and thing as beings	73
29. Definitions	76
30. Summary	76
31. Readings	77
 IV. BECOMING—CHANGE—MOTION	
32. The problem of change	80
33. Identity, distinction, and difference	82
34. The correct way to talk about change	85
35. A changing thing is composed	87
36. Definitions	89
37. Summary	90
38. Readings	90
 V. THE INTRINSIC PRINCIPLES OF CHANGE AND BEING: I. IN PARTICULAR	
39. Accidental change and the substance-accident composition of being	93
40. Substance and accident as beings by analogy	98
41. Substantial change and the matter-form composition of substance	100
42. Individuals in a species and matter-form composition	103
43. That-which-is and the act of existing (esse)	111
44. The agent and his activity	114
45. Definitions	116
46. Summary of the argumentation	117
47. Readings	118

VI. THE INTRINSIC PRINCIPLES OF BEING: II. AS ANALOGOUSLY ONE

48. Comparison of the three sets of intrinsic principles	124
49. Theorems of act and potency. I: Act and potency are distinct in their order	127
50. What is the potency for activity?	128
51. Theorem II: Act and potency are not strictly beings but principles of being	131
52. Theorem III: Act, in the order in which it is act, is unlimited in itself and limited by the potency in which it is received	132
53. Theorem IV: Act can be known by itself, potency only through act	136
54. Theorem V: Act and potency divide being in general	137
55. Concluding remarks about act and potency	137
56. Exercise	141
57. Readings	141

VII. THE EXTRINSIC PRINCIPLES OF BEING: I. THE AGENT

58. Principles of change	144
59. Causal factors	146
60. The causality of the agent, or efficient cause	147
61. Types of agents: univocal and equivocal causes	152
62. Types of agents: principal and instrumental causes	154
63. The exemplar cause	155
64. The theorem of causality	156
65. The analogy of causality	162
66. Definitions	164
67. Proofs	167
68. Readings	167

VIII. THE EXTRINSIC PRINCIPLES OF BEING: II. THE GOAL OF ACTION

69. The goal of action	171
70. Orientation in being	179
71. Chance	180
72. Definitions	183

73. Proof	184
74. Readings	184

IX. THE TRANSCENDENTALS

75. Being is a transcendental	187
76. Possibles	190
77. Beings of reason and pure intelligibilities	192
78. The transcendental "one"	194
79. Being-in-itself and being-for-another	196
80. The transcendental "true"	197
81. The transcendental "good"	202
82. Definitions	210
83. Proofs	211
84. Readings	211

PART TWO: NATURAL THEOLOGY

X. THE EXISTENCE OF GOD

1. The nature and characteristics of natural theology	219
2. State of the question	219
3. Explanation of terms	219
4. The proof	222
5. Readings	224
6. Selected passage from St. Thomas Aquinas	224
7. The nature and validity of <i>a posteriori</i> demonstration	225
8. Statement of the question	225
9. Explanation of terms	225
10. Readings	228

XI. PROOFS FOR THE EXISTENCE OF GOD

1. The first way: proof from the existence of motion	229
2. Statement of the problem	229
3. The solution	229
4. Whatever is changed is changed by another	230
5. In things that are changed by another an infinite regress is impossible	231
6. This first unmoved mover is pure act or God	233
7. Answering the objections	233
8. Summary of the first way	236

CONTENTS

xv

9. The second way: proof from the existence of efficient causes	239
10. Statement of the problem	239
11. The solution: step one: efficient causes essentially and accidentally ordered	240
12. Step two: general characteristics of a <i>per se</i> ordered series of efficient causes	241
13. Step three: special characteristics of a series of <i>per se</i> ordered efficient causes	243
14. Step four: Why there cannot be an infinite regress in <i>per se</i> ordered efficient causes	246
15. Answering the objections	246
16. Summary of the second way	249
17. The third way: proof from the existence of corruptible beings	252
18. Prenote	252
19. Solution	252
20. Answering the objections	259
21. Summary of the third way	263
22. The fourth way: proof of God's existence from grades of perfection in beings	265
23. Statement of the problem	265
24. Solution	266
25. The proof of the fourth way	271
26. Some added considerations	274
27. Answering the objections	275
28. Summary of the fourth way	277
29. The fifth way: the proof of the existence of God from the finalized activity of natural beings	280
30. Prenote	280
31. The problem of the fifth way	281
32. Solution	283
33. Answering the objections	288
34. Summary of the fifth way	295
35. A general proof for God's existence	299
36. Readings	303

XII. THE NATURE OF GOD

1. Man's knowledge of the divine nature	304
2. The problem of knowing the nature of God	304

3. Solution to the problem	305
4. Statement of the question	305
5. Explanation of terms	306
6. Adversaries	307
7. Proofs for our position	308
8. Readings	312
9. The problem of naming God	312
10. Can God be named?	312
11. Solution to the problem	312
12. Statement of the question	313
13. Explanation of terms	313
14. The proof	315
15. Readings	317

XIII. THE PERFECTIONS OF GOD

1. Prenote	318
2. Divisions of the divine perfections	318
3. The divine perfection of simplicity	320
4. God is absolutely simple	321
5. Solution	321
6. General proof	322
7. Answering the objections	323
8. God is completely perfect	324
9. Proof	324
10. How the perfections of creatures pre-exist in God	324
11. Prenote	324
12. Solution	325
13. Second solution	326
14. Answering the objections	331
15. God is infinite and supremely good	331
16. Prenote	331
17. Is the being of God really infinite or without limit?	332
18. Solution	332
19. Answering the objections	333
20. Is God supremely good?	334
21. How the divine perfections are distinct from the divine essence and from each other	336
22. Does the plurality of meanings that the divine attributes have exist only in our intellect or also in God?	338
23. Solution	338

CONTENTS

xvii

24. The opinion of Avicenna and Maimonides	341
25. The opinion of the Pseudo-Denis and St. Anselm	342
26. Reconciliation of these opinions	343
27. Answering the difficulties	345
28. Summary	346
29. Readings	349
30. The omnipresence, immutability, and eternity of God	349
31. Readings	351

XIV. GOD'S KNOWLEDGE AND WILL

1. God's knowledge of himself and other things	352
2. Statement concerning God's knowledge	352
3. Explanation of terms	353
4. The proof	354
5. Readings	356
6. The perfection of will in God	356
7. Statement concerning God's will	356
8. Explanation of terms	357
9. The proof	358
10. Readings	361

XV. GOD'S CREATION AND PROVIDENCE

1. The manner in which the world comes from God	362
2. Statement concerning creation	363
3. Explanation of terms	363
4. The proof	364
5. Readings	365
6. Divine providence	365
7. Statement concerning God's providence	366
8. Explanation of terms	367
9. The proof	367
10. Readings	368

XVI. GOD AS THE END OF MAN

1. Defining some terms	369
2. Applying these terms to God	369
3. Conclusion	372
4. Readings	372
