CONTENTS

1	Introduction	1
1.1	Graphs, digraphs, and homomorphisms	1
1.2	Homomorphisms preserve adjacency	3
1.3	Homomorphisms generalize colourings	6
1.4	The existence of homomorphisms	10
1.5	Homomorphisms generalize isomorphisms	16
1.6	Homomorphic equivalence	18
1.7	The composition of homomorphisms	20
1.8	Homomorphisms model assignments and schedules	27
1.9	Remarks	33
1.10	Exercises	34
2	Products and retracts	37
2.1	The product	37
2.2	Dimension	40
2.3	The Lovász vector and the Reconstruction Conjecture	43
2.4	Exponential digraphs	46
2.5	Shift graphs	47
2.6	The Product Conjecture and graph multiplicativity	51
2.7	Projective digraphs and polymorphisms	57
2.8	The retract	58
2.9	Isometric trees and cycles	60
2.10	Reflexive absolute retracts	65
2.11	Reflexive dismantlable graphs	68
2.12	Median graphs	73
2.13	Remarks	76
2.14	Exercises	78
3	The partial order of graphs and homomorphisms	81
3.1	The partial orders $\mathcal{C}$ and $\mathcal{C}_S$	81
3.2	Representing ordered sets	82
3.3	Incomparable graphs and maximal antichains in $\mathcal{C}_S$	85
3.4	Sparse graphs with specified homomorphisms	89
3.5	Incomparable graphs with additional properties	93
3.6	Incomparable graphs on n vertices	94
3.7	Density	96
3.8	Duality and gaps	98
3.9	Maximal antichains in $\mathcal{C}$	101
3.10	Bounds	102

3.11	Remarks	106
3.12	Exercises	107
4	The structure of composition	109
4.1	Introduction	109
4.2	Rigid digraphs	109
4.3	An excursion to infinity	115
4.4	The replacement operation	117
4.5	Categories	122
4.6	Representation	127
4.7	A combinatorial obstacle to representation	132
4.8	Some categories are not rich enough	135
4.9	Remarks	138
4.10	Exercises	139
5	Testing for the existence of homomorphisms	142
5.1	The H -colouring problem	142
5.2	Dichotomy for graphs	143
5.3	Digraph homomorphisms and CSPs	151
5.4	Duality and consistency	161
5.5	Pair consistency and majority functions	166
5.6	List homomorphisms and retractions	170
5.7	Trigraph homomorphisms	178
5.8	Generalized split graphs	183
5.9	Remarks	186
5.10	Exercises	188
6	Colouring—variations on a theme	192
6.1	Circular colourings	192
6.2	Fractional colourings	200
6.3	T -colourings	210
6.4	Oriented and acyclic colourings	212
6.5	Remarks	218
6.6	Exercises	219
	References	222
	Index	239
