FOREWORD by C.W. Kilmister	7
PREFACE	9
1 THE ARRANGEMENT OF IDEAS. Standpoint — A history of an experiment — The general pattern of ideas — Perception classes — Chains of notions — Integrative levels — Formative grades — Artefacts — Notation for levels and grades — Semantic types — Introduction of relations — Names and notation for the types — Full code sequences — The holotheme: a provisional summary.	11
2 THE DEVELOPMENT OF A THEORY. Properties of relations — Relation codes — Operations — Numbers — Mathematical structures — Into the domain of physics — Relation codes and the holotheme — Rules for placing notions — The pattern in brief.	40
3 BACKGROUND AND COMMENT. Some other views — Laws of the levels — The arrival of new levels — Aggregates of matter — Photons — Other recent work — Earlier work — The Greeks — Mediaeval to modern — Co-ordinate indexing — Data fields — Applications — Conclusion.	65
APPENDIXES	
A . A Data Field and its Contents	100
B . Examples of Placement	103

C . Previous Notes on the Levels	107
D . Summary of the Relation Code	115
GENERAL INDEX	118
PLACEMENT INDEX	125
