

CONTENTS

Notation **xv**

Preface **xix**

1	INTRODUCTION	1
	Population and Sample	2
	Use of Statistics in Engineering and Science	3
	Continuous and Discrete Variables	4
	Descriptive and Inference Problems	5
	Statistics and Probability	6
	Summary	8
2	EMPIRICAL FREQUENCY DISTRIBUTIONS	10
	Displaying Data	10
	Relation Between Frequency and Probability Distributions	11
	Tabulation of Data	13
	Frequency Grouping	14
	Cumulative Frequency	16
	Graphical Representation	17
	Accuracy and Precision of Measurements	20
	Significant Figures	22
	Solved Problem	22
	Problems	24
3	CHARACTERISTICS OF DISTRIBUTIONS: CENTRAL TENDENCY	28
	Averages	28
	Arithmetic Mean	29
	Median	32
	Mode	33
	Skewness	33
	Use of Mean, Median, and Mode	35
	Quantiles	35
	Geometric Mean	36
	Harmonic Mean	37
	Solved Problems	37
	Problems	42

4	CHARACTERISTICS OF DISTRIBUTIONS: DISPERSION	45
	Variance	45
	Standard Deviation	47
	Degrees of Freedom	48
	Simplified Computation of Standard Deviation	50
	Mean Deviation	53
	Coefficient of Variation	53
	Range	54
	Solved Problems	56
	Problems	59
5	PROBABILITY, PROBABILITY DISTRIBUTIONS, AND EXPECTATION	63
	Probability	63
	Probability Rules	65
	Total Probability Theorem	75
	Bayes' Rule	76
	Probability Distributions	78
	Discrete Probability Distributions	79
	Continuous Probability Distributions	84
	Some Important Probability Distributions	87
	A. Discrete Probability Distributions	87
	B. Continuous Probability Distributions	88
	Expectation	89
	Tchebysheff's Theorem	93
	Permutations	94
	Combinations	96
	Solved Problems	98
	Problems	103
6	SAMPLING DISTRIBUTIONS	107
	Sampling	107
	Definition of Sampling Distribution	109
	Sampling Distribution of the Sample Mean, \bar{x}	110
	Standard Deviation of the Sample Mean	113
	Central Limit Theorem	117
	Sampling from a Normally Distributed Population	120
	Sampling Distribution of Estimated Variance s^2	120
	Sampling the t Distribution	121
	Sampling the F Distribution	122
	Relation Between the Normal, χ^2 , t , and F Distributions	122
	Problems	124
7	STATISTICAL INFERENCE	126
	Point Estimators and Interval Estimators	127
	Properties of Estimators	127
	Null Hypothesis	129

- Alternative Hypothesis 130
- Type I and Type II Errors 131

8 BINOMIAL DISTRIBUTION 134

- Derivation 136
- Cumulative Terms for Binomial Distribution 141
- Pascal's Triangle 141
- Mean and Standard Deviation 143
- Comparison of Experimental and Binomial Distributions 145
- Solved Problems 152
- Problems 153

9 POISSON DISTRIBUTION 155

- Terms of the Poisson Distribution 156
- Some Practical Poisson Distributions 158
- Derivation from Binomial Distribution 161
- Mean and Standard Deviation 162
- Poisson Distribution as an Approximation to Binomial Distribution 164
- Usefulness of Poisson Distribution 165
- Poisson Probability Paper 168
- Solved Problems 169
- Problems 171

10 NORMAL DISTRIBUTION 173

- Gauss Function 173
- Derivation of the Function 175
- The Normal Curve 178
- Graphical Representation of Standard Deviation 182
- Area Under the Normal Curve 183
- Physical "Demonstration" of Normal Distribution 185
- Solved Problems 186
- Problems 188

11 USE OF NORMAL DISTRIBUTION 190

- Limits of Practical Distributions 190
- Some Important Probabilities 191
- Fitting a Normal Curve 193
- Probability Paper 196
- Mean Deviation in Normal Distribution 199
- Binomial Approximation 199
- Continuity Correction 200
- Transformation to a Normally Distributed Variate 202
- Lognormal Distribution 204
- Confidence Interval Estimation 209
- Confidence Interval for a Population Proportion 215
- Specifying a Minimum Value 217

Solved Problems 218
 Problems 231

12 REJECTION OF OUTLIERS 233

Reasons for Outliers 233
 Rejection on Basis of Estimated Variance 235
 Chauvenet's Criterion 236
 Dixon-Type Tests 237
 Problems 239

13 DISTRIBUTIONS OF EXTREMES 240

Failure Functions 240
 Exponential Distribution 243
 Mean Times to and Between Failures 246
 Reliability of a System with Series or Parallel Combinations 247
 Weibull Distribution 248
 Distribution of Extreme Values 253
 Flood Frequency Analysis 257
 Wind Frequency Analysis 265
 Solved Problem 266
 Problems 270

14 CHI-SQUARED DISTRIBUTION AND TESTS FOR GOODNESS OF FIT 273

χ^2 Distribution 273
 The χ^2 Test 277
 Degrees of Freedom in the χ^2 Test 279
 Minimum Class Frequency 280
 Continuity Correction 281
 Too Good a Fit 282
 χ^2 as a Measure of Goodness of Fit 283
 Contingency Tables 284
 The Kolmogorov-Smirnov (K-S) Test 286
 Solved Problems 287
 Problems 291

15 COMPARISON OF MEANS 293

Hypothesis Formulation 293
 Inference Errors and Their Probabilities 294
 One-Sided and Two-Sided Tests 298
 Relation Between α , β , and Sample Size n 300
 Procedure for Hypothesis Testing 302
 Normal Distribution Test 304
 One-Sample Test 304
 Two-Sample Test 307
 The t Test 310

One-Sample Test	310	
Two-Sample Test	311	
The t Test for Paired Data	314	
Interpretation of Results	315	
Case of Nonhomogeneous Variances	318	
Choice of Approach	320	
Distribution-Free or Nonparametric Tests	320	
Sign Test	320	
Wilcoxon Signed Rank Test	322	
Rank Test for Two Independent Samples	323	
Solved Problems	325	
Problems	330	
16	COMPARISON OF VARIANCES AND THEIR PROPERTIES	334
The F Test	334	
Standard Deviations of Various Statistics	338	
Comparison of Standard Deviations of Large Samples	339	
Confidence Limits for Variance	341	
Bartlett's Test	342	
Propagation of Errors	345	
Solved Problems	356	
Problems	360	
17	REGRESSION AND METHOD OF LEAST SQUARES	365
Scatter Diagram	366	
Two-Variable Linear Regression	366	
Method of Least Squares	369	
Regression Line	372	
Limitations of Method	376	
Confidence Limits of Regression Estimates	377	
Significance Test for Slope	382	
Use of the Method of Least Squares in Surveying	385	
Nonlinear Relations	386	
Rectification	388	
Uncertainty in Graphical Analysis	389	
Solved Problems	391	
Problems	402	
18	CORRELATION	407
Correlation Coefficient	410	
Distribution of r	413	
Test of Significance	413	
Correlation and Causation	415	
Solved Problems	416	
Problems	418	

19	MULTIPLE REGRESSION ANALYSIS	420
	Multiple Regression Equation	421
	Shorter Computation	423
	Use of Matrices	424
	General Procedure	427
	Estimation of Variance of Variable y	427
	Multiple Correlation Coefficient	428
	Significance of Multiple Regression as a Whole	429
	Confidence Limits of a Partial Regression Coefficient	430
	Solved Problems	432
	Problems	437
20	ANALYSIS OF VARIANCE (ANOVA)	440
	Rationale of Using ANOVA for Testing the Significance of Several Means	441
	Usual Method of Computation	445
	Sum of Squares	446
	F Test in the Analysis of Variance	447
	Test on Homogeneity of Variances	451
	ANOVA for One-Way Classification (Single Factor) with Random Effect	452
	Multiple Comparison Test	453
	Simplifying the Computations	454
	Multifactor Analysis	454
	Solved Problems	455
	Problems	462
21	TOLERANCE AND CONTROL CHARTS	465
	Specification and Tolerance Limits	465
	Stability of a Process	467
	Warning and Action Limits	467
	Mean Chart	468
	Range Chart	470
	Scheme of Operation	471
	Cumulative Sum Chart	474
	Charts Using Attributes	475
	Advantages of Quality Control	479
	Solved Problems	480
	Problems	483
22	ACCEPTANCE AND REJECTION TESTING	486
	Acceptance Sampling	486
	Choice of Sample Size	490
	Construction of the Power Curve	492
	Distribution of Strength of Accepted and Rejected Batches	498
	Simplified Case	503
	Sampling of Attributes	504

Solved Problem	507
Problems	510

23 INTRODUCTION TO THE DESIGN OF EXPERIMENTS 511

Two-Way Classification Analysis of Variance (ANOVA)	512
Partitioning the Total Variation	515
Test of Hypotheses	516
Advantages of a Two-Way over a One-Way Analysis of Variance (ANOVA)	523
Randomized Blocks	524
Latin Squares	528
Balanced Incomplete Blocks	532
Multiple Factor Experiments	533
Classical Three-Factor Experiment	534
Factorial Three-Factor Experiment	535
Partitioning the Treatments Sum of Squares	539
The Main Effects A , B , and C	539
The Interactions $A \times B$, $B \times C$, $A \times C$, $A \times B \times C$	540
Meaning of the Main and Interaction Effects	542
Graphical Interpretation	543
ANOVA Table with Missing Values	544
Analysis of Residuals	546
Random Numbers	546
Problems	547

Appendix A Bessel's Correction	551
---------------------------------------	------------

Appendix B Derivation of $P_r = e^{-\mu} \mu^r / r!$ from the Poisson Process	553
---	------------

Appendix C Mean and Standard Deviation of Terms of Expansion of $(\frac{1}{2} + \frac{1}{2})^{2n}$	555
--	------------

Appendix D Evaluation of $\int_{-\infty}^{+\infty} e^{-(X/2\sigma^2)} dX$	557
---	------------

Appendix E Relation Between t and r	559
--	------------

Appendix F Proof That the Regression Plane Contains the Centroidal Point	561
---	------------

Tables in Appendix	562
---------------------------	------------

Answers to Problems	593
----------------------------	------------

Index	603
--------------	------------
