

CONTENTS

Preface	
Chapter 1. Introduction	1
Chapter 2. Instrumental Considerations in the Design of Far-Infrared Spectrometers	25
Chapter 3. Techniques	57
Chapter 4. Barriers to Internal Rotation: Torsions	78
Chapter 5. Hydrogen-Bonded and Charge-Transfer Systems	103
Chapter 6. Complex Inorganic Systems	121
Chapter 7. Metal-Organic and Organic Compounds	188
Chapter 8. Spectroscopy of Crystal Lattices	214
Author Index	265
Subject Index	273
