

CONTENTS

Preface	IX
<i>Automation</i>	
Automatic analysis of tyre rubber blends by computer-linked pyrolysis gas chromatography (G.L. Coulter and W.C. Thompson).....	1
<i>Special techniques</i>	
Pyrolysis field ionization and field desorption mass spectrometry of biomacromolecules, microorganisms, and tissue material (H.-R. Schulten).....	17
Thermal procedures in coupling with thin-layer chromatography (E. Stahl).....	29
An automated analytical system for complex mixtures utilizing separation by high-resolution mass spectrometry and identification by collisional activation mass spectrometry (F.W. McLafferty).....	39
<i>Microbiology</i>	
The role of pyrolysis-gas liquid chromatography in biomedical studies (E. Reiner).....	49
Comparison on oral streptococci by pyrolysis GLC (M.V. Stack, H.D. Donoghue, J.E. Tyler and M. Marshall).....	57
Pyrolysis gas-liquid chromatography studies of the genus <i>Bacillus</i> . Effect of growth time on pyrochromatogram reproducibility (G.S. Oxborrow, N.D. Fields and J.R. Puleo).....	69
The identification of microorganisms by pyrolysis gas-liquid chromatography (M. Needleman and P. Stuchbery).....	77
<i>Forensic science and pharmacology</i>	
Forensic applications of analytical pyrolysis techniques (B.B. Wheals).....	89
Application of Curie-point pyrolysis gas chromatography using high-resolution glass open-tubular columns (J.P. Schmid, P.P. Schmid and W. Simon).....	99
The identification of formulated drugs by Py-GC-MS (W.J. Irwin and J.A. Slack).....	107

VI

Pyrolysis mass spectrometry

Structure and degradation behaviour of synthetic polymers using pyrolysis in combination with field ion mass spectrometry (D.O. Hummel)..... 117

Direct pyrolysis of aromatic and aliphatic polyesters in the mass spectrometer (I. Lüderwald and H. Urrutia)..... 139

Reproducibility and specificity

Some numerical aspects of reproducibility and specificity (W. Eshuis, P.G. Kistemaker and H.L.C. Meuzelaar)..... 151

Soil chemistry and geochemistry

Pyrolysis studies on humus in freely drained Scottish soils (J.M. Bracewell and G.W. Robertson) 167

The determination of polysaccharides in fulvic acids by pyrolysis gas chromatography (F. Martin) 179

Pyrolysis as a possible means of determining the petroleum generating potential of sedimentary organic matter (S.R. Larter, B. Horsfield and A.G. Douglas)..... 189

Curie-point pyrolysis in organic geochemistry (W.L. Maters, D. v.d. Meent, P.J.W. Schuyl, J.W. de Leeuw, P.A. Schenck and H.L.C. Meuzelaar) 203

Biochemistry

Pyrolysis GLC of biomedically interesting molecules (F.L. Bayer, J.J. Hopkins and F.M. Menger). 217

The application of Curie-point pyrolysis mass spectrometry in fungal taxonomy (A.C.M. Weijman). 225

Laser pyrolysis

Laser induced pyrolysis techniques (N.E. Vanderborgh)..... 235

Laser pyrolysis GC/MS of membrane components (J.C. Means and E.G. Perkins)..... 249

Reaction mechanisms

Pyrolytic reaction mechanisms (D.C. De Jongh).... 261

Pyrolysis mass spectrometry of model compounds labelled with stable isotopes (M.A. Posthumus and N.M.M. Nibbering)..... 277

Curie-point pyrolysis as a guide to new syntheses (G. Schaden).....	289
Pyrolysis-mass spectrometry of truxillic and truxinic polyamides and related copolyamides (I. Lüderwald, M. Przybylski, H. Ringsdorf, S. Foti and G. Montaudo).....	297
<i>Polymers</i>	
Pyrolysis/gas chromatography as a means of determining the quality of porous polymers of styrene cross-linked with divinyl benzene (N. Sellier, C.E.R. Jones and G. Guiochon).....	309
The analysis of automotive paints by pyrolysis gas chromatography (E.J. Levy).....	319
Characterisation of textile materials by thermal degradation: A critique of pyrolysis GC and thermogravimetry (J.S. Crighton).....	337
An interfaced vapor phase instrumental system for thermal analysis and pyrolysis (P.C. Uden, D.E. Henderson and R.J. Lloyd).....	351
Analytical pyrolysis of inorganic and thermostable polymers (T. Székely and M. Blazs6).....	365
Pyrolysis-gas chromatography and spectroscopic identification of fluorine polymers (H.-J. Kretzschmar, D. Gross and J. Kelm).....	373
Automation of a thermogravimetry apparatus with a laboratory computer (B. Dickens, W.J. Pummer and J.H. Flynn).....	383
Microstructures of vinyl-type copolymers by pyrolysis-gas chromatography (S. Tsuge and T. Takeuchi)	393
<i>Appendix</i>	
Gas chromatographic mass spectrometry (K. Biemann)	406
Curie-point evaporation: A new and simple technique for splitless injection on open tubular capillary columns (J.W. de Leeuw, W.L. Maters, D. v.d. Meent, J.J. Boon, P.A. Schenck and H.L.C. Meuzelaar).....	407
The classification and identification of microorganisms by pyrolysis-mass spectrometry (P.A. Quinn, J. Swanson, H.L.C. Meuzelaar and P.G. Kistemaker)	408

VIII

Quantitative and kinetic studies by pyrolysis gas chromatography (I. Ericsson).....	410
Curie-point pyrolysis mass spectrometry using a Knudsen reactor (P.P. Schmid, Ch.U. Oertli, M. Müller, M.F. Kutter, J.P. Schmid and W. Simon)	411
The scope of automated pyrolysis mass spectrometry (H.L.C. Meuzelaar, A. Tom, H. v.d. Brink, P.G. Kistemaker, W. Eshuis and H.H. Tuithof).....	412
Pyrolysis gas chromatographic correlation trials of the American Society for Testing and Materials (J.Q. Walker).....	413
Specificity in analytical pyrolysis (R.L. Levy)..	414
Study of the thermal degradation of organic polymers using different metal surfaces as the heat source (E.M. Andersson and I. Ericsson).....	415
Application of pyrohydrolysis for a rapid and accurate determination of halides in silicate rocks and minerals (J.S. Hetman).....	416
The quantitative analysis of choline esters in biological samples by pyrolysis gas chromatography-mass spectrometry (P.I.A. Szilagyi and J.P. Green).....	417
Laser pyrolysis-gas chromatographic-mass spectrometric analysis of epoxy composites (C. Merritt, Jr., M.L. Bazinet, R.E. Sacher and J. Sprouse)...	419
Laser pyrolysis/mass spectrometry of biopolymers (P.G. Kistemaker, H.H. Tuithof, A.J.H. Boerboom, B. Neering and H.L.C. Meuzelaar).....	420
Thermochemistry of polybenzimidazole foams (I.N. Einhorn, D.A. Chatfield and D.J. Wendel)...	421
Theory of thermal decomposition and volatilization of normal alkanes and linear polyethylene (M. Seeger)	422
Identification and structural investigation of phenolic resins by a novel set of PGC techniques (T. Toth).....	424
