List of Contributors	v
Contents of Other Volumes	vii
Preface	xi

Chapter 1

MIXED-LIGAND METAL ION COMPLEXES OF AMINO ACIDS AND PEPTIDES

R. P. Martin, M. M. Petit-Ramel, and J. P. Scharff

1. Introduction	2
2. Detection of Mixed-Ligand Complexes	4
3. Factors Governing the Formation and the Stability of Mixed Complexes	7
4. Copper Complexes	17
5. Nickel Complexes	29
6. Other Metal Complexes	32
7. Conclusion	36
Abbreviations	37
Appendix	39
References	55

Chapter 2

STRUCTURAL ASPECTS OF MIXED-LIGAND COMPLEX FORMATION IN SOLUTION

Helmut Sigel

1. Introduction	64
2. Methods to Characterize the Stability of Mixed-Ligand Complexes	65
3. Mixed-Ligand Cu^{2+} Complexes	66
4. Mixed-Ligand Complexes Containing Co^{2+} , Ni^{2+} , Zn^{2+} , or Several Other Metal Ions	97
5. Catalytic Qualities of Mixed-Ligand Complexes	113
6. Conclusions	116
Abbreviations and Definitions	118
References	119

Chapter 3

KINETIC STUDY OF THE FORMATION OF MIXED-LIGAND COMPLEXES
OF BIOLOGICAL INTEREST

V. S. Sharma and D. L. Leussing

1. Introduction	127
2. Ternary Complexes - Theoretical Considerations	130
3. Calculation of Rate Constants from Near Equilibrium Kinetics	135
4. Kinetics of Formation and Dissociation of Mixed-Ligand Complexes	142
5. Conclusions	164
6. Abbreviations	165
References	165

Chapter 4

MULTIMETAL-MULTILIGAND EQUILIBRIA: A MODEL FOR
BIOLOGICAL SYSTEMS

D. D. Perrin and R. P. Agarwal

1. Metal Ions and Ligands in Biological Systems	168
2. Mathematical Models for Biological Systems	170
3. The Metal-Ligand Model for Blood Plasma	173
4. Applications	196
5. Future Developments	199
6. Appendix. Some Typical Minicomics Programs	201
References	202

Chapter 5

ARTIFICIAL ENZYMES

Arthur E. Martell

1. Introduction	208
2. Activation of Substrate toward Nucleophilic Attack by Metal Ion Coordination	212
3. Electron Transfer Reactions	239
4. Oxidation Reactions Involving Oxygen Insertion	257
5. Concluding Remarks	261
References	263

Author Index	269
Subject Index	283
