

Contents

Chapter 1. Introduction	1
Chapter 2. Preliminaries	9
2.1. Spacetimes and c-boundaries	9
2.2. Finsler manifolds	13
2.3. Conformally stationary spacetimes	14
Chapter 3. Cauchy completion of a generalized metric space	15
3.1. Basic definitions	15
3.2. Forward and backward Cauchy boundaries as point sets	16
3.3. Quasi-distance and topology on the Cauchy completions	22
3.4. Relating M_C^+ and M_C^- through the extended quasi-distance	25
Chapter 4. Riemannian Gromov and Busemann completions	29
4.1. Gromov completion	29
4.2. Busemann completion as a point set	36
Chapter 5. Finslerian completions	39
5.1. Gromov completions for the non-symmetric case	40
5.2. Busemann completions	44
5.3. Chronological topology vs Gromov topology	51
5.4. Proof of Theorem 1.1	56
Chapter 6. C-boundary of standard stationary spacetimes	59
6.1. Chronological relations and Lipschitzian functions	59
6.2. Future and past c-boundaries as point sets	60
6.3. The (total) c-boundary as a point set	62
6.4. Causality of the c-boundary	66
6.5. Topology of the partial boundaries and the c-boundary	68
6.6. Proof of Theorem 1.2	70
Bibliography	75
