# New Directions in Locally Compact Groups

*Edited by*

PIERRE-EMMANUEL CAPRACE  
*Université Catholique de Louvain, Belgium*

NICOLAS MONOD  
*École Polytechnique Fédérale de Lausanne*

**CAMBRIDGE**  
UNIVERSITY PRESS

# Contents

	<i>Foreword by George Willis</i>	<i>page vii</i>
1	<b>On the role of totally disconnected groups in the structure of locally compact groups</b> <i>Burger</i>	1
2	<b>Locally compact groups as metric spaces</b> <i>Tessera</i>	9
3	<b>A short primer on profinite groups</b> <i>Wilson</i>	17
4	<b>Lectures on Lie groups over local fields</b> <i>Glöckner</i>	37
5	<b>Abstract quotients of profinite groups, after Nikolov and Segal</b> <i>Klopsch</i>	73
6	<b>Automorphism groups of trees: generalities and prescribed local actions</b> <i>Garrido–Glasner–Tornier</i>	92
7	<b>Simon Smith’s construction of an uncountable family of simple, totally disconnected, locally compact groups</b> <i>Reid–Willis</i>	117
8	<b>The Neretin groups</b> <i>Garncarek–Lazarovich</i>	131
9	<b>The scale function and tidy subgroups</b> <i>Brehm–Gheysens–Le Boudec–Rollin</i>	145
10	<b>Contraction groups and the scale</b> <i>Wesolek</i>	161
11	<b>The Bader–Shalom normal subgroup theorem</b> <i>Gal</i>	171
12	<b>Burger–Mozes’ simple lattices</b> <i>Bartholdi</i>	179
13	<b>A lecture on invariant random subgroups</b> <i>Gelander</i>	186
14	<b><math>L^2</math>-Betti number of discrete and non-discrete groups</b> <i>Sauer</i>	205
15	<b>Minimal normal closed subgroups in compactly generated tdlc groups</b> <i>Dumont–Gulko</i>	227
16	<b>Elementary totally disconnected locally compact groups, after Wesolek</b> <i>Cesa–Le Maître</i>	236

<b>17</b>	<b>The structure lattice of a totally disconnected locally compact group</b>	<i>Wilson</i>	258
<b>18</b>	<b>The centraliser lattice</b>	<i>Hume–Stulemeijer</i>	267
<b>19</b>	<b>On the quasi-isometric classification of locally compact groups</b>	<i>Cornulier</i>	275
<b>20</b>	<b>Future directions in locally compact groups: a tentative problem list</b>	<i>Caprace–Monod</i>	343
	<i>Index</i>		357
