

Prof. Dr.-Ing. Vladimir Blažek, Aachen
Prof. Dr. med. Ulrich Schultz-Ehrenburg, Berlin (Eds.)

Frontiers in computer-aided visualization of vascular functions

**Proceedings of the Seventh International Symposium CNVD
'97, January 10–12, 1997, Paris/France**

Reihe **20**: Rechnerunterstützte
Verfahren

Nr. **263**

Contents

V. Blažek, U. Schultz-Ehrenburg	
Advances in optical imaging of skin structures and vessel functions .	1
A. Dölemeyer, S. Wolf, O. Ziermann, D. Meyer-Ebrecht	
Automatic quantification of blood perfusion parameters in the retinal vascular system	7
O. Such, V. Blažek	
Visualization of the venous plexus in skin with IR-CCD	13
U. Haberland, O. Saam, V. Blažek, H. J. Schmitt	
Optical coherence tomography with tunable lasers	19
G. Nilsson	
Opportunities and limitations in laser Doppler perfusion monitoring and imaging for assessment of tissue blood flow	25
K. Wårdell	
Reactive hyperemic response evaluated by duplex laser Doppler perfusion imaging	33
P. Urban, H.-P. Berlien	
Comparative investigation of vascular lesions - Colour coded duplex sonography, laser Doppler perfusion imaging, infrared thermography	37
U. Haberland, P. Peterka, V. Blažek	
Depth resolved laser Doppler imaging with synthesised coherence functions using tunable lasers - Concepts and theoretical aspects	41
S. Bassez, P. Flaud, M. Chauveau	
Steady flow of a viscous fluid through an elastic tube using a "universal" law. Application to blood flow in the veins of the lower limb in man	47
J. Hektor, T. Förster, J. Jansen, F. Broicher, H. Schmid-Schönbein, R. Grebe	
Microvascular network investigation by reconstruction, modeling and simulation of hydrodynamic properties using mesenteric networks	55
F. C. Roessler, R. Vandenhouten, R. Grebe	
A nonlinear computer model of the entire cardiovascular system	63

V. Blažek, E. W. Gaelings, J. Reul	
Prediction of fluid dynamics in the vascular system of the brain - Methods and simulation model	73
J. Reul, E. W. Gaelings, V. Blažek	
Prediction of fluid dynamics in the vascular system of the brain - Clinical aspects	81
W. Feuerstein	
Clinical relevance of D-PPG parameters	87
C. Nüchel, N. G. Weindorf	
Effects of physical exercise training on venous hemodynamics	93
V. Štvrtinová, J. Pecháň, P. Lesný, M. Arpášová	
The role of photoplethysmography in the diagnostic process of calf deep venous thrombosis	97
U. Schultz-Ehrenburg, G. Gallenkemper, V. Blažek	
Acrar arterial photoplethysmography - a new basic tool for clinical vascular diagnostic	101
H. Schmid-Schönbein, St. Ziege, R. Grebe, V. Blažek	
Combined measurements of the temporal dynamics of laser Doppler and Photoplethysmographic data and their interpretation on the basis of physiological synergetics	109
M. J. Hayes, P. R. Smith, D. M. Barnett, M. D. L. Morgan, S. Singh, D. D. Vara	
Quantitative investigation of artefact in photoplethysmography and pulse oximetry for respiratory exercise testing	117
J. Drescher, A. Diedrich, J.-L. Rome, J. Tank, K. Lichtenhahn, U. Aksamski, H.-P. Pätzug	
Investigation of skin microcirculation in paraplegics using a Near In- frared (NIR) diagnostic device	125
M. Hahn, M. Jünger	
Computer-aided analysis of pulsatile signals in vascular medicine ...	133
M. Mukunda Rao, V. Jagdeesh Kumar, G. S. V. Ramananda Rao	
Noninvasive monitoring or arterial oxygen saturation using a micro- controller	139

H. Partsch, G. Menzinger, V. Blažek	
Static and dynamic measurement of compression pressure	145
F. Louisy, C. André-Deshays, D. Cauquil, M. Lazerges, C. Lafaye, A. L. Camus, P. Schroiff, G. Gallina	
Use of air plethysmography during the French-Russian mission EO 22 on board of the Mir Space station	153
U. Schmeink, Th. Schmeink, I. Lossau, V. Roschansky	
D-PPG and Duplex-ultrasound: Correlation of results in the diagnosis of deep vein insufficiency	161
J. G. Heckmann, M. Mück-Weymann, M. J. Hilz, D. Claus, B. Neundörfer	
Transcranial Doppler sonography under ergometer stress suggests di- minished sympathetic cerebrovascular activity in tension type headache	165
P. Lesný, V. Štvrtinová, L. Stanová, J. Pacák	
Relation between ultrasound and angiographic investigation of the carotid and vertebral arteries	169
J. Spáčil, R. Česka, J. Šobra, J. Petrášek	
A four - year ultrasound study of the common carotid artery in fa- milial hyperlipoproteinaemia	175
M. Mück-Weymann, H. P. Albrecht, P. von den Driesch	
Visualization of small vessels using color coded Doppler sonography	179
L. Geisen, D. Leyk, U. Hoffmann, D. Essfeld	
Computer-aided evaluation of continuously recorded Doppler mea- surements during ergometer exercise	183
J. U. Fischbach, R. Beck	
2D- and 3D-LED-scanner system for the acquisition of plethysmo- graphic data	189
M. Mück-Weymann, D. Hager, K. Streubel, R. Kalb, T. Rechlin	
Some new investigations regarding the "inspiratory gasp response"	197
