Preface, by M. Barbut	5
Symbol index	9

1. Trees

by P. Rosenstiehl and B. Leclerc

Introduction	15
1. Tree words	16
2. Rooted semi-lattices	31
3. Modules on trees	39
Bibliography	55

2. Ordering and classification

by B. Monjardet

Introduction	59
1. Quasiorderings	60
2. Equivalence relations	68
3. Orderings	75
4. Quasiorderings revisited	84
5. Some applications	87
Bibliography	90

3. Boolean algebras, Boolean rings

by G. Th. Guilbaud

1. The present status of Boolean algebras	91
2. Description of a Boolean algebra	96
3. Boolean rings	101

4. Simplicial objects

by G. Th. Guilbaud

1. The first model: simple complex or simplex	107
2. Some other models	112
3. Simplicial category (abstract complex)	118
4. Simplicial sets (set complexes)	119
5. Products of simplexes	121
Bibliographic notice	125

5. Monoids and groups

by C. d'Adhémar

Introduction	127
1. Monoids	128
2. Groups	134
3. Homomorphisms	139
4. Permutations	141
Bibliography	145

6. Measure scales

by M. Barbut

Introduction	147
1. Elements of the typology of ordinal scales (types of order)	149
2. The additive calculus (abelian groups)	152
3. Additive numerical scales (totally ordered abelians)	159
4. The additive and multiplicative scales	165
5. Interval scales. Affine scales	171
Bibliography	176

Subject index	178
