## CHAPTER 1

### INTRODUCTION

1.1 Descriptive Statistics	2
1.2 Inferential Statistics	3
1.3 Relationship and Prediction	4
1.4 Our Concern: Applied Statistics	4
1.5 The Role of Applied Statistics	5
1.6 Do Statistics Lie?	7
1.7 Other Concerns about Statistics	8
Point of Controversy: Are Statistics Necessary?	9
1.8 Some Tips on Studying Statistics	10
1.9 Summary	11

---

## CHAPTER 2

### FOUNDATIONAL CONCEPTS

2.1 Random Samples	16
2.2 Variables and Constants	17
2.3 Scales of Measurement	18
2.4 Scales of Measurement and Problems of Statistical Treatment	21
2.5 Computational Accuracy with Continuous Variables	22
2.6 Summary	23

---

## CHAPTER 3

### GRAPHIC DISTRIBUTIONS, MODES, AND

### PERCENTILES

### AND LIMITS

3.1 Organizing Qualitative Data	29
3.2 Grouped Scores	29
3.3 How to Construct a Grouped Frequency Distribution	31
3.4 Apparent versus Real Limits	33

3.5 The Relative Frequency Distribution	34
3.6 Stem-and-Leaf Displays	36
3.7 The Cumulative Frequency Distribution	37
3.8 Percentiles and Percentile Ranks	38
3.9 Computing Percentiles from Grouped Data	41
3.10 Computation of Percentile Rank	44
3.11 Summary	44

---

## CHAPTER 4

### GRAPHIC REPRESENTATION OF FREQUENCY DISTRIBUTIONS

4.1 Basic Procedures	49
4.2 The Histogram	50
4.3 The Frequency Polygon	52
4.4 Choosing Between a Histogram and a Polygon	53
4.5 The Bar Diagram and the Pie Chart	56
4.6 The Cumulative Percentage Curve	58
4.7 Factors Affecting the Shape of Graphs	60
4.8 Characteristics of Frequency Distributions	62
4.9 Summary	66

---

## CHAPTER 5

### CENTRAL TENDENCY

5.1 The Mode	72
5.2 The Median	72
5.3 The Arithmetic Mean	73
5.4 Properties of the Mode	75
5.5 Properties of the Mean	75

Point of Controversy: Is It Permissible to Calculate the Mean for Psychological and Educational Tests? 77

5.6 Properties of the Median	78
------------------------------	----

5.7 Measures of Central Tendency in Symmetrical and Asymmetrical Distributions	80	7.6 The Normal Curve as a Model for Real Variables	120
5.8 The Effects of Score Transformations	82	7.7 The Normal Curve as a Model for Sampling Distributions	121
5.9 Summary	82	Point of Controversy: How Normal Is the Normal Curve?	122
<hr/>		7.8 Summary	123
<b>CHAPTER 6</b>		<hr/>	
<b>VARIABILITY</b>	<b>87</b>	<b>CHAPTER 8</b>	
6.1 The Range	89	<b>DERIVED SCORES</b>	<b>127</b>
6.2 The Semi-Interquartile Range	89	8.1 The Need for Derived Scores	127
6.3 Deviation Scores	90	8.2 Standard Scores	128
6.4 Deviation Measures: The Variance	91	8.3 Translating Raw Scores to Standard Scores	130
6.5 Deviation Measures: The Standard Deviation	92	8.4 Standard Scores as Linear Transformations of Raw Scores	132
Point of Controversy: Calculating the Sample Variance: Should We Divide by $n$ or $(n - 1)$ ?	93	8.5 Percentile Scores	133
6.6 Calculation of the Variance and Standard Deviation: Raw-Score Method	94	8.6 Comparability of Scores	134
6.7 Properties of the Range	96	8.7 Normalized Standard Scores	136
6.8 Properties of the Semi-Interquartile Range	96	8.8 Combining Measures from Different Distributions	137
6.9 Properties of the Standard Deviation	97	8.9 Summary	138
6.10 Score Transformations and Measures of Variability	99	<hr/>	
6.11 Standard Scores ( $z$ Scores)	99	<b>CHAPTER 9</b>	
6.12 Measures of Variability and the Normal Distribution	101	<b>CORRELATION</b>	<b>143</b>
6.13 Comparing the Means of Two Distributions	102	9.1 Some History	144
6.14 Summary	103	9.2 Graphing Bivariate Distributions: The Scatter Diagram	146
<hr/>		9.3 Correlation: A Matter of Direction	148
<b>CHAPTER 7</b>		9.4 Correlation: A Matter of Degree	150
<b>THE NORMAL CURVE</b>	<b>109</b>	9.5 Understanding the Meaning of Degree of Correlation	152
7.1 Historical Aspects of the Normal Curve	109	9.6 Formulas for Pearson's Coefficient of Correlation	153
7.2 The Nature of the Normal Curve	112	9.7 Calculating $r$ from Raw Scores	157
7.3 Standard Scores and the Normal Curve	114	9.8 Correlation Does Not Establish Causation	158
7.4 The Standard Normal Curve: Finding Areas When the Score is Known	114	9.9 The Effects of Score Transformations	160
7.5 The Standard Normal Curve: Finding Scores When the Area is Known	118	9.10 Cautions Concerning Correlation Coefficients	161
		9.11 Other Ways to Measure Association	164
		9.12 Summary	165

---

**CHAPTER 10**  
**PREDICTION 173**

10.1 The Problem of Prediction	173
10.2 The Criterion of Best Fit	175
Point of Controversy: Least-Squares Regression versus the Resistant Line	177
10.3 The Regression Equation: Standard-Score Form	177
10.4 The Regression Equation: Raw-Score Form	178
10.5 Error of Prediction: The Standard Error of Estimate	180
10.6 An Alternative (and Preferred) Formula for $S_{yx}$	183
10.7 Error in Estimating $Y$ from $X$	184
10.8 Cautions Concerning Estimation of Predictive Error	186
10.9 Summary	187

---

**CHAPTER 11**  
**INTERPRETIVE ASPECTS OF**  
**CORRELATION AND REGRESSION 193**

11.1 Factors Influencing $r$ : Range of Talent	193
11.2 The Correlation Coefficient in Discontinuous Distributions	195
11.3 Factors Influencing $r$ : Heterogeneity of Samples	196
11.4 Interpretation of $r$ : The Regression Equation I	197
11.5 Interpretation of $r$ : The Regression Equation II	199
11.6 Regression Problems in Research	201
11.7 An Apparent Paradox in Regression	202
11.8 Interpretation of $r$ : Proportion of Variation in $Y$ Not Associated with Variation in $X$	204
11.9 Interpretation of $r$ : Proportion of Variance in $Y$ Associated with Variance in $X$	206
11.10 Interpretation of $r$ : Proportion of Correct Placements	208
11.11 Summary	210

---

**CHAPTER 12**  
**PROBABILITY 215**

12.1 Defining Probability	215
12.2 A Mathematical Model of Probability	217
12.3 Two Theorems in Probability	218
12.4 An Example of a Probability Distribution: The Binomial	219
12.5 Applying the Binomial	222
12.6 The Frequency Distribution (and Normal Curve) as a Probability Distribution	224
12.7 Are Amazing Coincidences Really that Amazing?	225
12.8 Summary	226

---

**CHAPTER 13**  
**THE BASIS OF**  
**STATISTICAL INFERENCE 231**

13.1 A Problem in Inference: Testing Hypotheses	232
13.2 A Problem in Inference: Estimation	232
13.3 Basic Issues in Inference	233
13.4 Random Sampling	234
13.5 Using a Table of Random Numbers	236
13.6 The Random Sampling Distribution of the Mean: An Introduction	237
13.7 Characteristics of the Random Sampling Distribution of the Mean	240
13.8 Putting the Sampling Distribution of the Mean to Use	243
13.9 Summary	247

---

**CHAPTER 14**  
**TESTING HYPOTHESES ABOUT**  
**SINGLE MEANS ( $z$  and  $t$ ) 253**

14.1 Testing a Hypothesis About a Single Mean	253
14.2 When Do We Retain and When Do We Reject the Hypothesis?	254
14.3 Generality of the Procedure for Hypothesis Testing	255
14.4 Dr. Frost's Problem: Conclusion	255

14.5	Review of Assumptions in Inference about a Single Mean	258
14.6	Estimating the Standard Error of the Mean When $\sigma$ is Unknown	259
14.7	The $t$ Distribution	261
14.8	Characteristics of Student's Distribution of $t$	262
14.9	Degrees of Freedom and Student's Distribution of $t$	264
14.10	Using Student's Distribution of $t$	265
14.11	An Example: Professor Dyett's Question	266
14.12	Computing $t$ from Raw Scores	268
14.13	Directional and Nondirectional Alternative Hypotheses	271
14.14	Reading Research Reports in Behavioral Science	272
	Example of Bootstrapping: The Bootstrap Value of a Central Inference	273
14.15	Problems in Selecting a Random Sample and in Drawing Conclusions	274
14.16	Summary	275

---

15.1	Statement of the Hypothesis	283
15.2	Choice of $H_A$ : One-Tailed and Two-Tailed Tests	284
15.3	The Criterion for Rejecting or Retaining $H_0$	286
15.4	The Statistical Decision	288
15.5	A Statistically Significant Difference Versus a Practically Important Difference	288
15.6	Errors in Hypothesis Testing	290
15.7	Levels of Significance Versus $p$ -Values	292
15.8	Summary	293
		294

---

CHAPTER 16  
TESTING HYPOTHESES ABOUT THE DIFFERENCE BETWEEN TWO INDEPENDENT MEANS 299

16.1	The Random Sampling Distribution of the Difference Between Two Sample Means	301
16.2	An Illustration of the Sampling Distribution of the Difference Between Means	302
16.3	Properties of the Sampling Distribution of the Difference Between Means	304
16.4	Determining a Formula for $t$	305
16.5	Testing the Hypothesis of No Difference Between Two Independent Means: The Dyslexic Children Experiment	308
16.6	The Conduct of a One-Tailed Test	310
16.7	Sample Size in Inference about Two Means	311
16.8	Assumptions Associated with Inference about the Difference Between Two Independent Means	311
16.9	The Random-Sampling Model Versus the Random Assignment Model	313
16.10	Random Sampling and Random Assignment as Experimental Controls	314
16.11	The Experiment Versus the <i>In Situ</i> Study	315
16.12	Summary	316

---

17.1	Determining a Formula for $t$	324
17.2	Degrees of Freedom for Tests of No Difference Between Dependent Means	325
17.3	Testing a Hypothesis about Two Dependent Means	326

17.4 An Alternative Approach to the Problem of Two Dependent Means	328
17.5 Advantages of the Dependent-Samples Design	331
17.6 Hazards of the Dependent-Samples Design	331
17.7 Summary	333

---

## CHAPTER 18

### ESTIMATION OF $\mu$ AND $\mu_X - \mu_Y$ 339

18.1 Two Ways of Making Estimates	340
18.2 Interval Estimates of $\mu_X$	340
18.3 Interval Estimates of $\mu_X - \mu_Y$	343
18.4 Evaluating an Interval Estimate	346
18.5 Sample Size Required for Estimates of $\mu_X$ and $\mu_X - \mu_Y$	347
18.6 The Relation Between Interval Estimation and Hypothesis Testing	349
18.7 The Merits of Interval Estimation	350
18.8 Summary	351

---

## CHAPTER 19

### POWER AND MEASURE OF EFFECT SIZE 355

19.1 Type I Error and Type II Error	356
19.2 The Power of a Test	356
Point of Controversy: Failure to Publish "Nonsignificant" Results	357
19.3 Factors Affecting Power: Discrepancy Between the True Population Mean and the Hypothesized Mean (Size of Effect)	358
19.4 Factors Affecting Power: Sample Size	359
19.5 Factors Affecting Power: Variability of the Measure and Dependent Samples	360
19.6 Factors Affecting Power: Level of Significance ( $\alpha$ )	360
19.7 Factors Affecting Power: One-Tailed Versus Two-Tailed Tests	361
19.8 Summary of Factors Affecting Power	362
19.9 Calculating the Power of a Test	363

19.10 Effect Size	364
19.11 Estimating Power and Sample Size for Tests of Hypotheses about Means	366
19.12 Some Implications of Power Curves	369
19.13 Reporting Inferential Statistics	369
Point of Controversy: Meta-Analysis	370
19.14 Summary	371

---

## CHAPTER 20

### ONE-WAY ANALYSIS OF VARIANCE (AND SOME ALTERNATIVES) 377

20.1 The Null Hypothesis	378
20.2 The Logic of One Way Analysis of Variance: Variation Within and Between Groups	379
20.3 Partition of Sums of Squares	381
20.4 Degrees of Freedom	383
20.5 Variance Estimates and the $F$ Ratio	384
20.6 The Summary Table	386
20.7 An Example	387
20.8 Raw-Score Formulas for Analysis of Variance	390
20.9 Comparison of $t$ and $F$	392
20.10 Assumptions Associated with ANOVA	392
20.11 ANOVA and Power	393
20.12 <i>Post Hoc</i> Comparisons	393
20.13 An Alternative to the $F$ Test: Planned Comparisons	396
20.14 How to Construct Planned Comparisons	397
20.15 An Alternative for Comparing One Control Group with Several Experimental Groups: Dunnett's Test	400
Point of Controversy: Analysis of Variance Versus <i>A Priori</i> Comparisons	401
20.16 Analysis of Variance for Repeated Measures	402
20.17 Summary	407

**CHAPTER 21**  
**FACTORIAL ANALYSIS**  
**OF VARIANCE:**  
**THE TWO-FACTOR DESIGN 413**

21.1	Main Effects	415
21.2	Interaction	416
21.3	The Importance of Interaction	419
21.4	Partition of the Sum of Squares for Two-Way ANOVA	420
21.5	Degrees of Freedom	424
21.6	Variance Estimates and <i>F</i> Tests	425
21.7	Studying the Outcome of Two-Way Analysis of Variance	427
21.8	Planned Comparisons	429
21.9	Assumptions of the Two-Factor Design and the Problem of Unequal Numbers of Scores	429
21.10	Mixed Two-Factor Within-Subjects Design	429
21.11	Summary	435

**CHAPTER 22**  
**INFERENCE ABOUT PEARSON**  
**CORRELATION COEFFICIENTS 441**

22.1	The Random Sampling Distribution of <i>r</i>	441
22.2	Testing the Hypothesis that $\rho = 0$	442
22.3	Fisher's <i>z'</i> Transformation	444
22.4	Estimating $\rho$	446
22.5	Testing the Hypothesis of No Difference Between $\rho_1$ and $\rho_2$ : Independent Samples	448
22.6	A Note About Assumptions	450
22.7	Summary	450

**CHAPTER 23**  
**TESTING AND INFERENCE**  
**FOR FREQUENCIES 453**

23.1	A Problem in Discrepancy Between Expected and Observed Frequencies	453
------	--	-----

23.2	Chi-Square ( $\chi^2$ ) as a Measure of Discrepancy Between Expected and Observed Frequencies	455
23.3	The Logic of the Chi-Square Test	456
23.4	Interpretation of the Outcome of a Chi-Square Test	458
23.5	Different Hypothesized Proportions in the Test for Goodness of Fit	458
23.6	Assumptions in the Use of the Theoretical Distribution of Chi-Square	459
23.7	Hypothesis Testing When <i>df</i> = 1	459
23.8	Two Variables: Contingency Tables and the Hypothesis of Independence	460
23.9	Finding Expected Frequencies in a Contingency Table	462
23.10	Calculation of $\chi^2$ and Determination of Significance in a Contingency Table	464
	Point of Controversy: Yates' Correction for Continuity	467
23.11	Interval Estimates About Proportions	467
23.12	Other Applications of Chi-Square	469
23.13	Summary	470

**CHAPTER 24**  
**SOME (ALMOST)**  
**ASSUMPTION-FREE TESTS 475**

24.1	Randomization Tests	476
24.2	How to Place Scores in Rank Order	478
24.3	Test of Location for Two Independent Groups: The Mann-Whitney <i>U</i> Test	479
	Point of Controversy: A Comparison of the <i>t</i> test and Mann-Whitney <i>U</i> Test with Real-World Distributions	482
24.4	Test of Location Among Several Independent Groups: The Kruskal-Wallis Test	483
24.5	Test of Location for Two Dependent Groups: The Sign Test	484

24.6 Test of Location for Two Dependent Groups: The Wilcoxon Signed-Ranks Test	488	Table A: Areas Under the Normal Curve Corresponding to Given Values of $z$	552
24.7 Spearman's Rank-Order Correlation Coefficient	490	Table B: The Binomial Distribution	558
Point of Controversy: Objectivity and Subjectivity in Inferential Statistics	492	Table C: Random Numbers	561
24.8 Summary	494	Table D: Student's $t$ Distribution	564
		Table E: The $F$ Distribution	566
		Table F: The Studentized Range Statistic	569
		Table G: Dunnett's Test: Distribution of $t$ Statistic in Comparing Several Treatment Means with One Control	570
		Table H: Values of the Correlation Coefficient Required for Different Levels of Significance When $H_0: \rho = 0$	572
		Table I: Values of Fisher's $z'$ for Values of $r$	574
		Table J: The $\chi^2$ Distribution	575
		Table K: Critical One-Tail Values of $\Sigma R_x$ for the Mann-Whitney $U$ Test	577
		Table L: Critical Values for the Smaller of $W_+$ or $W_-$ for the Wilcoxon Signed-Ranks Tests	579
<b>EPILOGUE:</b>		REFERENCES	580
<b>THE REALM OF STATISTICS</b>	<b>499</b>	INDEX	585
APPENDIX A REVIEW OF BASIC MATHEMATICS	503		
APPENDIX B SUMMATION RULES	515		
APPENDIX C LIST OF SYMBOLS	517		
APPENDIX D ANSWERS TO ODD-NUMBERED PROBLEMS	520		
APPENDIX E STATISTICAL ANALYSIS BY COMPUTER	537		
APPENDIX F STATISTICAL TABLES	551
