# CONTENTS

<b>1. Introduction</b>	<b>1</b>
1.1. Brief description of the results	2
1.2. General strategy for the proofs	7
<b>2. General setting</b>	<b>11</b>
<b>3. Resonance free domains</b>	<b>15</b>
3.1. Weak trapping	15
3.2. Strong trapping	18
<b>4. Asymptotic of the resonances generated by a finite number of homoclinic trajectories</b>	<b>25</b>
4.1. Main results	25
4.2. Remarkable phenomena	29
4.3. The one dimensional situation	47
4.4. Resonances in deeper zones	52
4.5. Asymptotic of higher order	67
4.6. Tangential intersection of finite order	69
<b>5. Asymptotic of the resonances generated by nappes of homoclinic trajectories</b>	<b>77</b>
5.1. Main results	77
5.2. Applications and examples	83
<b>6. Generalization to multiple barriers</b>	<b>97</b>
6.1. General result	97
6.2. Applications and examples	105

<b>7. Resonant states</b>	<b>119</b>
<b>8. General reduction</b>	<b>133</b>
8.1. The contradiction argument	133
8.2. Energy localization	134
8.3. Spatial localization	134
8.4. Vanishing in the incoming region	135
8.5. Propagation of singularities	136
8.6. Microlocalization near the trapped set	138
<b>9. Proof of Theorem 3.2</b>	<b>141</b>
<b>10. Proof of Theorem 3.8</b>	<b>145</b>
10.1. Reduction to the tangential part	145
10.2. Study of the tangential part	148
<b>11. Proof of the asymptotic of the resonances for a finite number of homoclinic curves</b>	<b>159</b>
11.1. From the quantization rule to the asymptotic of the pseudo-resonances	159
11.2. Resonance free zone and resolvent estimate	164
11.3. Existence of resonances near the pseudo-resonances	168
11.4. Proof of Proposition 4.6	175
<b>12. Proof of the other results of Chapter 4</b>	<b>177</b>
12.1. Proof of the stability results	177
12.2. Resonance free domains below the accumulation curves	179
12.3. Proof when a change of multiplicity occurs	182
12.4. Proof for the other subsets of resonances	187
12.5. Proof of the asymptotic of higher order	197
12.6. Proof for tangential intersection of finite order	201
<b>13. Proof of the asymptotic of the resonances for a nappe of homoclinic curves</b>	<b>211</b>
13.1. Resonance free zone and resolvent estimate	211
13.2. Existence of resonances near the pseudo-resonances	217
13.3. Proof of the additional results of Chapter 5	221
<b>14. Proof of the main results of Chapter 6</b>	<b>225</b>

14.1. Notations and tools	225
14.2. Study of the classical system	228
14.3. Resonance free zone and resolvent estimate	236
14.4. Existence of resonances near the pseudo-resonances	239
<b>15. Proof of the other results of Chapter 6</b>	<b>247</b>
<b>16. Proof of the asymptotic of the resonant states</b>	<b>253</b>
<b>A. Review of semiclassical analysis</b>	<b>263</b>
A.1. Microlocal terminology	263
A.2. Propagation through a hyperbolic fixed point	265
<b>B. Some properties of the Hamiltonian flow</b>	<b>269</b>
B.1. Consequences of the assumption (H4)	269
B.2. Proof of the assertions appearing before Theorem 3.8 and Theorem 5.3	272
B.3. Construction of potential bumps with large scattering angles	279
B.4. Proof of Proposition 4.12	285
B.5. Proof of Lemma 10.2	287
B.6. A self-adjoint operator for Example 7.11	291
<b>C. Spectral radius of <math>\mathcal{T}_0</math> and <math>\mathcal{T}</math></b>	<b>295</b>
<b>D. Distorted and truncated estimates</b>	<b>299</b>
<b>E. Semiclassical maximum principle</b>	<b>303</b>
<b>Notations</b>	<b>305</b>
<b>Bibliography</b>	<b>307</b>
