# Table of Contents

Preface.....	xi
Introduction.....	xxiii

---

## Part I. Building Your Application

<b>1. Mocking Up the Save The Child Application.....</b>	<b>3</b>
Considering Mobile First	4
Introducing Balsamiq Mockups	6
The Project Owner Talks to a Web Designer	7
Creating First Mockups	7
Turning Mockups into a Prototype	11
Single-Page Applications	11
Running Code Examples from WebStorm	12
Our First Prototype	13
Our Main Page JavaScript	18
The Footer Section	22
The Donate Section	24
Adding Video	30
Adding the HTML5 Video Element	30
Embedding YouTube Videos	33
Adding Geolocation Support	35
Geolocation Basics	37
Integration with Google Maps	39
Browser Feature Detection with Modernizr	43
Search and Multimarkers with Google Maps	48
Summary	52
<b>2. Using Ajax and JSON.....</b>	<b>53</b>
Understanding Ajax	53

---

Understanding JSON	54
Working with Ajax	55
Retrieving Data from the Server	56
Ajax: Good and Bad	59
Populating States and Countries from HTML Files	60
Using JSON	62
Populating States and Countries from JSON Files	64
Using Arrays in JSON	66
Loading Charity Events by Using Ajax and JSON	67
Using JSON in CMS	69
Handling JSON in Java	71
Compressing JSON	72
Adding Charts to Save The Child	73
Adding a Chart with the Canvas Element	74
Adding a Chart by Using SVG	78
Loading Data from Other Servers by Using JSONP	81
Beer and JSONP	83
Summary	85
<b>3. Introducing the jQuery Library.....</b>	<b>87</b>
Getting Started with jQuery	88
Hello World	90
Using Selectors and Filters	91
Testing jQuery Code with JSFiddle	92
Filtering Elements	93
Handling Events	94
Attaching Event Handlers and Elements by Using the Method on()	95
Delegating Events	96
Using Ajax with jQuery	97
Handy Shorthand Methods	99
Programming Save The Child by Using jQuery	100
Login and Donate	100
Loading HTML States and Countries by Using jQuery Ajax	104
Loading JSON States and Countries by Using jQuery Ajax	105
Submitting the Donate Form	108
Using jQuery Plug-ins	114
Validating the Donate Form by Using a Plug-in	114
Adding an Image Slider	117
Summary	119

---

## Part II. Enterprise Considerations

<b>4. Developing Web Applications in the Ext JS Framework.....</b>	<b>123</b>
Exploring JavaScript Frameworks	123
Choosing to Use Ext JS	124
Downloading and Installing Ext JS	125
Becoming Familiar with Ext JS and Tooling	127
Creating the First Version of Hello World	127
Generating Applications with the Sencha CMD Tool	129
Choosing Which Ext JS Distribution to Use	134
Declaring, Loading, and Instantiating Classes	134
Best Practice: MVC	139
Exploring a Component's Life Cycle	146
Working with Events	147
Specifying Layouts	148
Developing Save The Child with Ext JS	150
Setting Up the Eclipse IDE and Apache Tomcat	150
Running the Top Portion of the Save The Child UI	156
Completing Save The Child	170
Summary	185
<b>5. Selected Productivity Tools for Enterprise Developers.....</b>	<b>187</b>
Using Node.js, V8, and npm	188
Automating Everything with Grunt	188
Exploring the Simplest Gruntfile	189
Using Grunt to Run JSHint Checks	189
Watching for the File Changes	192
Using Bower	193
Using Yeoman	195
Using Ext JS and CDB for Productive Enterprise Web Development	199
Ext JS MVC Application Scaffolding	200
Generating a CRUD Application	203
Data Pagination	211
Summary	216
<b>6. Modularizing Large-Scale JavaScript Projects.....</b>	<b>217</b>
Understanding Modularization Basics	219
Exploring Roads to Modularization	221
The Module Pattern	221
CommonJS	224
Asynchronous Module Definition	227
Universal Module Definition	230
ECMAScript 6 Modules	231
Dicing the Save The Child Application into Modules	234

Inside the RequireJS Configuration: config.js	237
Writing AMD Modules	238
Loading Modules On Demand	239
Using RequireJS Plug-ins	242
Using RequireJS Optimizer	242
Loosely Coupled InterModule Communications with Mediator	246
Summary	252
<b>7. Test-Driven Development with JavaScript.....</b>	<b>253</b>
Why Test?	254
Testing Basics	254
Unit Testing	255
Integration Testing	255
Functional Testing	255
Load Testing	256
Test-Driven Development	259
Implementing TDD by Using QUnit	260
Behavior-Driven Development with Jasmine	264
Multibrowser Testing	275
Testing the DOM	280
Building Save The Child with TDD	282
Harnessing the ExtJS Application	282
Testing the Models	285
Testing the Controllers	286
Testing the Views	288
Setting Up the IDE for TDD	290
Summary	294
<b>8. Upgrading HTTP to WebSocket.....</b>	<b>295</b>
Using HTTP for Near Real-Time Applications	296
Polling	296
Long Polling	297
HTTP Streaming	297
Implementing Server-Sent Events	298
Introducing the WebSocket API	300
The WebSocket Interface	300
The Client-Side API	302
Using WebSocket Frameworks	308
The Portal	308
Atmosphere	309
Choosing the Format for Application-Level Messages	310
CSV	311

XML	311
JSON	312
Google Protocol Buffers	312
Using WebSocket with Proxies	314
Adding an Auction to Save The Child	315
Monitoring WebSocket Traffic by Using Chrome Developer Tools	322
Sniffing WebSocket Frames by Using Wireshark	325
Creating the Save The Child Auction Protocol	330
Summary	333

<b>9. Introduction to Web Application Security.....</b>	<b>335</b>
HTTP versus HTTPS	336
Authentication and Passwords	337
Basic and Digest Authentication	338
Single Sign-on	339
Handling Passwords	340
Authorization	341
OAuth-Based Authentication and Authorization	342
Federated Identity with OpenID Connect and JSON Web Tokens	343
OAuth 2.0 Main Actors	345
Save The Child and OAuth	345
Top Security Risks	347
Injection	347
Cross-Site Scripting	349
Regulatory Compliance and Enterprise Security	351
Summary	353

---

## Part III. Responsive Web Design and Mobile Devices

<b>10. Responsive Design: One Site Fits All.....</b>	<b>359</b>
One or Two Versions of Code?	360
How Many User Agents Are There	364
Back to Mockups	367
CSS Media Queries	371
How Many Breakpoints?	380
Fluid Grids	381
Moving Away from Absolute Sizing	381
Window as a Grid	382
Responsive CSS: The Good News	392
Making Save The Child Responsive	393
Fluid Media	403

Summary	405
<b>11. jQuery Mobile.....</b>	<b>407</b>
Obtaining jQuery Mobile	407
Organizing the Code	408
Seeing How It Looks on Mobile Devices	411
Styling in jQuery Mobile	413
Adding Page Navigation	414
Adding Persistent Toolbars	419
Using jQuery Mobile for Save The Child	424
Prototyping the Mobile Version	425
Project Structure and Navigation	439
Selected Code Fragments	445
Summary	461
<b>12. Sencha Touch.....</b>	<b>463</b>
Introducing Sencha Touch	464
Performing Code Generation and Distribution	465
Constructing the UI	472
Using Sencha Touch for Save The Child	479
Building the Application	479
The Application Object	481
The Main View	484
Controller	490
Other Views in Save The Child	493
Stores and Models	511
Working with Landscape Mode	513
Comparing jQuery Mobile and Sencha Touch	514
<b>13. Hybrid Mobile Applications.....</b>	<b>517</b>
Native Applications	517
Native versus Web Applications	518
Hybrid Applications	519
Cordova and PhoneGap	519
Titanium	521
The Bottom Line	522
Introduction to the PhoneGap Workflows	523
Creating One More Hello World	524
Testing Applications on iOS Devices	529
Installing More Local SDKs	530
Using the Adobe PhoneGap Build Service	530
Distributing Mobile Applications	536

Save The Child with PhoneGap	537
Using PhoneGap to Package Any HTML5 Application	538
Adding Camera Access to Save The Child	539
Providing Sever-Side Support for Photo Images	542
Summary	545
<b>14. Epilogue.....</b>	<b>547</b>
HTML5 Is Not a Rosy Place	547
Dart: A Promising Language	549
HTML5 Is in Demand Today	550
<b>A. Selected HTML5 APIs.....</b>	<b>551</b>
<b>B. Running Code Samples and IDE.....</b>	<b>593</b>
<b>Index.....</b>	<b>597</b>
