# *Discovering Astronomy*

---

<sup>al dr</sup>  
R. ROBERT ROBBINS / WILLIAM H. JEFFERYS  
UNIVERSITY OF TEXAS, AUSTIN

JOHN WILEY & SONS

NEW YORK CHICHESTER BRISBANE TORONTO SINGAPORE

# CONTENTS

<b>1 ★ Astronomy: An Observational Science</b>	<b>1</b>	3.5	Coriolis Effects: Additional Evidence for a Spinning Earth	42	
1.1	Introduction	2	3.6	The Motions of the Sky	43
1.2	A Grand Tour of the Universe	2	3.7	Observing the Stars in the Northern Part of the Sky	47
1.3	An Expedition to Earth	7	3.8	Observing the Rest of the Sky: Using the Star Maps	48
1.4	Astronomy as an Observational Science	9	3.9	Names, Designations, and Brightnesses of Stars	49
1.5	Orders of Magnitude in the Universe—Large to Small	10	3.10	Observing Tips	50
1.6	The Explosion of Knowledge in the Twentieth Century	12	<i>Activity 3-1 Measuring Northern Stars with Quadrant and Cross-Staff</i>	52	
1.7	Objectives and Chapter Review	13	<i>Activity 3-2 Measuring the Full Sky</i>	54	
1.8	Suggestions for Further Reading	14	3.11	Objectives and Chapter Review	56
1.9	Answers to Selected Questions	14	3.12	Suggestions for Further Reading	56
			3.13	Answers to Selected Questions	57
<b>2 ★ Introduction to Astronomical Observations: Measurement with a Cross-Staff and Quadrant</b>	<b>15</b>	<b>4 ★ The Motion of the Sun, Moon, and Planets</b>	<b>58</b>		
2.1	Introduction	16	4.1	Introduction	59
2.2	Angles and Angular Measurement	17	4.2	The Motion of the Sun	59
2.3	Angles on the Celestial Sphere	17	4.3	The Reasons for the Seasons	61
2.4	The Relation between True and Apparent Size: Solar Eclipses	18	4.4	The Motion and Phases of the Moon	62
2.5	Measurement Errors in Science and Astronomy	20	4.5	The Motions of the Planets	64
2.6	Systematic Errors in Astronomy: The Kapteyn Universe	22	<i>Activity 4-1 The Diurnal Motion of the Sun Observed with a Gnomon</i>	65	
<i>Activity 2-1 Construction and Use of an Astronomical Cross-Staff</i>	24	<i>Activity 4-2 The Motion of the Sun with Respect to the Stars</i>	69		
<i>Activity 2-2 Constructing and Using an Astronomical Quadrant</i>	30	<i>Activity 4-3 Observing the Sunset Point</i>	69		
2.7	Objectives and Chapter Review	33	<i>Activity 4-4 The Motion and Phases of the Moon</i>	70	
2.8	Suggestions for Further Reading	34	<i>Activity 4-5 The Motions of the Planets</i>	73	
2.9	Answers to Selected Questions	34	4.6	Objectives and Chapter Review	76
			4.7	Suggestions for Further Reading	76
			4.8	Answers to Selected Questions	76
<b>3 ★ Measuring the Sky</b>	<b>35</b>	<b>5 ★ Models of the Solar System</b>	<b>77</b>		
3.1	Introduction	36	5.1	Introduction	78
3.2	Early Observations of the Sky	36	5.2	Greek Astronomy	78
3.3	The Interaction of Concepts and Observations: The Round Earth	38	5.3	Astronomy During the Middle Ages	84
3.4	The Rotating Earth	42	5.4	The Heliocentric Hypothesis	85

- 5.5 Kepler's Laws of Planetary Motion 88
- 5.6 The Invention of Modern Physics 90
- 5.7 Proof of the Heliocentric Hypothesis 96
- Activity 5-1 A Parallax Measurement 99**
- 5.8 Objectives and Chapter Review 100
- 5.9 Suggestions for Further Reading 101
- 5.10 Answers to Selected Questions 102

## 6 ★ *The Structure and Formation of the Solar System* 103

- 6.1 Introduction 104
- 6.2 An Overview of the Solar System 104
- 6.3 Orbital Regularities in the Solar System 105
- 6.4 The Distribution of Angular Momentum in the Solar System 107
- 6.5 Minor Constituents of the Solar System 107
- 6.6 Theories of the Origin of the Solar System 108
- 6.7 Modern Theories 110
- 6.8 Do Other Stars Have Planets? 114
- 6.9 Objectives and Chapter Review 115
- 6.10 Suggestions for Further Reading 115
- 6.11 Answers to Selected Questions 116

## 7 ★ *The Debris of the Solar System: Comets, Minor Planets, and Meteorites* 117

- 7.1 Introduction 118
- 7.2 Comets 118
- 7.3 Minor Planets 123
- 7.4 Meteors, Meteor Showers, and Meteorites 126
- 7.5 Interplanetary Dust 131
- 7.6 Meteorites and the Early Solar System 131
- 7.7 Did a Supernova Explosion Trigger the Formation of Our Solar System? 132
- 7.8 Objectives and Chapter Review 133
- 7.9 Suggestions for Further Reading 134
- 7.10 Answers to Selected Questions 134

## 8 ★ *The Moon* 135

- 8.1 Introduction 136
- 8.2 Earth-Based Studies of the Moon 136
- 8.3 Examining the Lunar Surface 137
- Activity 8-1 Lunar Surface Features, As Seen From Earth 137**
- Activity 8-2 Surface Details from Lunar Orbiter Photographs 139**
- 8.4 Manned Exploration of the Lunar Surface 145
- 8.5 The Origin of the Moon 147
- 8.6 The Tides and the Future of the Earth–Moon System 148
- 8.7 The Lunar Laser-Ranging Program 151
- 8.8 Objectives and Chapter Review 152
- 8.9 Suggestions for Further Reading 153
- 8.10 Answers to Selected Questions 153

## 9 ★ *The Planets* 155

- 9.1 Introduction 156
- 9.2 Jupiter 156
- 9.3 Saturn 161
- 9.4 Uranus 163
- 9.5 Neptune 166
- 9.6 Pluto 166
- 9.7 Mercury 167
- 9.8 Venus 169
- 9.9 Mars 172
- 9.10 The Atmospheres of the Terrestrial Planets 177
- 9.11 The Possibility of Contact with Extraterrestrial Life 178
- 9.12 Objectives and Chapter Review 181
- 9.13 Suggestions for Further Reading 182
- 9.14 Answers to Selected Questions 182

## 10 ★ *Electromagnetic Radiation* 183

- 10.1 Introduction 184
- 10.2 Light as a Ray: Reflection 184
- Activity 10-1 Images in a Mirror 184**
- 10.3 Light as a Ray: Refraction 186

- Activity 10-2** *Refraction of Light* 186
- 10.4 Light as a Wave: Diffraction 187
- Activity 10-3** *Diffraction of Light Passing through a Slit* 188
- 10.5 Electromagnetic Radiation 190
- 10.6 The Speed of Light 192
- 10.7 Interference 193
- 10.8 The Dispersion of Light 194
- Activity 10-4** *The Diffraction Grating* 194
- 10.9 Objectives and Chapter Review 195
- 10.10 Suggestions for Further Reading 195
- 10.11 Answers to Selected Questions 196

## 11 ★ *Telescopes: The Eye into the Universe* 197

- 11.1 Introduction 198
- 11.2 The Formation of Images 198
- Activity 11-1** *How Lenses Form Images* 199
- Activity 11-2** *Other Properties of Lenses* 201
- 11.3 Telescopes 202
- Activity 11-3** *Making a Telescope* 205
- 11.4 Reflecting Telescopes versus Refracting Telescopes 206
- 11.5 Reflecting Telescopes of Various Types 206
- 11.6 The Large Telescopes of the Future 208
- 11.7 Detectors at the Focus of the Telescope 211
- 11.8 Radio Astronomy 212
- 11.9 The New Astronomies 216
- 11.10 Objectives and Chapter Review 219
- 11.11 Suggestions for Further Reading 220
- 11.12 Answers to Selected Questions 220

## 12 ★ *Observations with a Small Telescope* 221

- 12.1 Introduction 222
- 12.2 General Considerations 222
- Activity 12-1** *Map of the Moon* 223
- Activity 12-2** *Telescopic Observations of the Sun* 225

- Activity 12-3** *The Diameter of the Sun* 227
- Activity 12-4** *Observations of Stars, Clusters, and Nebulae* 229
- 12.3 Descriptions of Sky Objects 230
- Activity 12-5** *Observations of the Planets* 235
- 12.4 Suggestions for Further Reading 235
- 12.5 Answers to Selected Questions 236

## 13 ★ *Spectra: The Key to the Universe* 237

- 13.1 Introduction 238
- Activity 13-1** *Observing Radiation Patterns* 238
- Activity 13-2** *Analyzing Light Sources with a Spectrometer* 239
- 13.2 Principle of the Spectrometer 242
- 13.3 The Continuous Spectrum 244
- 13.4 How the Continuous Spectrum Depends on Temperature 245
- 13.5 Discrete Emission Spectra 247
- 13.6 Dark-Line Spectra: The Sun 248
- 13.7 A Model of the Sun 250
- 13.8 Objectives and Chapter Review 251
- 13.9 Answers to Selected Questions 251

## 14 ★ *The Interaction of Light and Matter* 252

- 14.1 Introduction 253
- 14.2 Light as a Particle 253
- 14.3 Models of the Atom 254
- 14.4 Energy Level Diagram of the Hydrogen Atom 256
- 14.5 Why Different Elements Have Different Spectra 258
- 14.6 Atomic Explanation of Kirchhoff's Laws 259
- 14.7 Objectives and Chapter Review 261
- 14.8 Answers to Selected Questions 261

## 15 ★ *The Spectra of Stellar Atmospheres* 262

- 15.1 Introduction 263
- 15.2 Spectral Types 263

**Activity 15-1** *Classification Using Known Spectra* 266

- 15.3 Why Spectra Vary in Appearance 267
- 15.4 The Variation of the Hydrogen Balmer Spectrum 268
- 15.5 The Cosmic Abundance 269
- 15.6 The Doppler Effect 271
- 15.7 What Can Be Learned from Line Profiles 272
- 15.8 Objectives and Chapter Review 275
- 15.9 Suggestions for Further Reading 276
- 15.10 Answers to Selected Questions 276

**16** ★ *The Observed Properties of Normal Stars* 277

- 16.1 Introduction 278
- 16.2 Plotting the Hertzsprung–Russell Diagram 280
- 16.3 Interpreting the Hertzsprung–Russell Diagram 281
- 16.4 Stellar Radii: Main-Sequence, Giant, Supergiant, and Dwarf Stars 283
- 16.5 Explanation of the Main Sequence 284
- 16.6 Spectroscopic Parallaxes 286
- 16.7 Binary Stars 287
- 16.8 Recent Studies of Stellar Sizes 289
- 16.9 Objectives and Chapter Review 291
- 16.10 Suggestions for Further Reading 291
- 16.11 Answers to Selected Questions 292

**17** ★ *The Structure of the Sun and Stars* 293

- 17.1 Introduction 294
- 17.2 The Power Produced by the Sun 294
- 17.3 Nuclear Energy Sources 295
- 17.4 The Conditions Required for Fusion 298
- 17.5 Antimatter and Neutrinos 300
- 17.6 The Stellar Equilibrium 301
- 17.7 The Lifetimes of Stars 302
- 17.8 The Sun—A Typical Star 303
- 17.9 Objectives and Chapter Review 312

- 17.10 Suggestions for Further Reading 312
- 17.11 Answers to Selected Questions 313

**18** ★ *Stellar Evolution* 314

- 18.1 Introduction 315
- 18.2 The Evolution of the Sun 315
- 18.3 Pulsating Stars 318
- 18.4 Dying Stars: The White Dwarfs 319
- 18.5 Planetary Nebulae 320
- 18.6 The Evolution of More Massive Stars 323
- 18.7 The Observational Evidence for Stellar Evolution 324
- 18.8 Objectives and Chapter Review 328
- 18.9 Suggestions for Further Reading 329
- 18.10 Answers to Selected Questions 329

**19** ★ *Cataclysmic Astronomy* 330

- 19.1 Introduction 331
- 19.2 Novae 331
- 19.3 Supernovae 334
- 19.4 Pulsars and Neutron Stars 339
- 19.5 The Bottom Line: Black Holes 343
- 19.6 The Cosmic Zoo Acquires Some New Specimens 345
- 19.7 Objectives and Chapter Review 346
- 19.8 Suggestions for Further Reading 346
- 19.9 Answers to Selected Questions 347

**20** ★ *The Interstellar Material and Star Formation* 348

- 20.1 Introduction 349
- 20.2 Ionized Gas between the Stars 349
- 20.3 Neutral Gas between the Stars 352
- 20.4 The Structure of the Interstellar Medium 354
- 20.5 Interstellar Dust 355
- Activity 20-1** *Polarized Light* 359
- 20.6 Molecules in the Interstellar Medium 360
- 20.7 The Formation of Stars 362
- 20.8 The Search for Stellar Precursors 364

20.9	A Prominent Region of Star Formation: The Orion Nebula	365		
20.10	Objectives and Chapter Review	367		
20.11	Suggestions for Further Reading	368		
20.12	Answers to Selected Questions	368		
<b>21</b>	<b>★ <i>The Milky Way: Our Galaxy</i></b>	<b>369</b>		
21.1	Introduction	370		
21.2	Our Place in the Galaxy	370		
21.3	The Motion of Stars in the Galaxy	373		
21.4	21-cm Studies of the Galaxy	375		
21.5	The Cause of Spiral Structure	378		
21.6	The Galactic Magnetic Field	379		
21.7	Cosmic Rays	380		
21.8	Stellar Populations	382		
21.9	The Formation and Evolution of Our Galaxy	383		
21.10	Objectives and Chapter Review	385		
21.11	Suggestions for Further Reading	385		
21.12	Answers to Selected Questions	386		
<b>22</b>	<b>★ <i>Galaxies</i></b>	<b>387</b>		
22.1	Introduction	388		
22.2	The Historical Problem of the “Nebulae”	388		
	<i>Activity 22-1 Classification of Galaxy Types from Sky Survey Photographs</i>	391		
22.3	The Morphology of Galaxies	392		
22.4	The Distances of the Galaxies	394		
	<i>Activity 22-2 The Variation in Sizes of Galaxies</i>	396		
22.5	Our Neighborhood: The Local Group	399		
22.6	The Color and Stellar Content of Other Galaxies	401		
22.7	The Formation and Evolution of Galaxies	402		
22.8	Superclusters of Galaxies	406		
22.9	Objectives and Chapter Review	407		
22.10	Suggestions for Further Reading	407		
22.11	Answers to Selected Questions	408		
<b>23</b>	<b>★ <i>Peculiar and Unusual Extragalactic Objects</i></b>	<b>409</b>		
23.1	Introduction	410		
23.2	Radio Galaxies	410		
23.3	Seyfert Galaxies and Other “Active” Galaxies	414		
23.4	Quasars	415		
23.5	Objectives and Chapter Review	421		
23.6	Suggestions for Further Reading	421		
23.7	Answers to Selected Questions	422		
<b>24</b>	<b>★ <i>The Origin and Evolution of the Universe</i></b>	<b>423</b>		
24.1	Introduction	424		
24.2	The Expansion of the Universe	424		
	<i>Activity 24-1 The Expansion of the Universe</i>	425		
24.3	The Big Bang	426		
24.4	Alternatives to the Big Bang Theory	429		
24.5	The Background Radiation	431		
24.6	The Future of the Universe	434		
24.7	The Geometry of Space and the Shape of the Universe	437		
24.8	The Halley–Olbers Paradox	439		
	<i>Activity 24-2 Observing the Background Radiation</i>	440		
24.9	Objectives and Chapter Review	441		
24.10	Suggestions for Further Reading	441		
24.11	Answers to Selected Questions	442		
<b>25</b>	<b>★ <i>Science and Pseudoscience</i></b>	<b>443</b>		
25.1	A True Story	444		
25.2	The “Game” of Science	444		
25.3	How to Tell the Sheep from the Goats	445		
25.4	Suggestions for Further Reading	449		
	EPILOGUE TO THE FIRST EDITION	452		
	EPILOGUE TO THE SECOND EDITION	453		
	APPENDIX 1	454		
	PHOTO CREDITS	467		
	INDEX	469
